Fluorescent Light Bulb Removal

RPR Environmental, the company that removes our waste on a biweekly basis, will also be picking up used fluorescent tubes.

Please drop off the used bulbs in one of the following three pickup locations: Tower loading dock, the receiving bay of Earp residences or the receiving bay of Lowenberger residence. These pick up locations are marked on the map which is available below.

All bulbs should be stored in boxes. If you do not have enough boxes please contact Irene Palumbo ext 3407 and we will make arrangements for RPR to bring appropriate packing materials.

Once enough bulbs have accumulated, please contact Irene Palumbo at ext 3407. Pick up days are scheduled for every other Friday.

A calendar of scheduled dates is available on our web site.
