

Thanks to the combined efforts of Mr. Craft's and Mr. Roslinsky's grade four class, and Mrs. McAllister's grade three/four class, the students at Humphrey School were able to present Chris Parent from the Rattlesnake Research Program of Killbear Park with a cheque donation. The school raised the money for the program during Earth Week.

Mr. Craft and Mrs. McAllister organized Earth Week activities including a staff/student cosom hockey game. Pizza Day proceeds were also donated to the cause.

Mr. Craft's and Mrs. McAllister's classes spent two months studying the rattlesnake, concluding their work with a trip to Killbear Park. They hope the money raised will help Chris and the staff of Killbear Park to further develop the research project.
