

Master of Business Administration & Master of Public Health Concurrent Degrees Program

The first of its kind in Canada, this hybrid (face-to-face and online) graduate program is a true interdisciplinary initiative between the Department of Health Sciences and Goodman School of Business. Its structure allows full-time domestic and international students to complete two degrees in two years. Part-time studies allow up to six years to complete both degrees. With a focus on public health management, graduates are exposed to relevant and complementary health and business concepts. The program also includes a mandatory 32-week internship in the second year of study providing experiential learning in the health sector.

PROGRAM DURATION:

Full-time Course Based - 2 years (6 terms)

Part-time Course Based - up to 6 years

ADMISSION REQUIREMENTS:

Successful completion of a four-year Bachelor's degree, or equivalent, from an accredited university in any discipline with an average of not less than 80% (A-). While not a requirement, it is strongly recommended that applicants have undergraduate preparation and/or a knowledge-based proficiency in epidemiology and biostatistics. Although not mandatory, professional work and/or volunteer experience in a public health organization is a valuable asset.

A minimum score of 550 on the Graduate Management Admissions Test (GMAT) or a minimum score at the 60th percentile for both the verbal and quantitative reasoning sections on the GRE revised General Test is required. However, each year a limited number of applicants with extensive managerial work experience (a minimum of ten to fifteen years at mid-management or higher level) and a GMAT score of at least 600 who do not hold an undergraduate degree may be admitted to the program.

For students who must provide proof of English Language Proficiency, a minimum Academic IELTS score of 7.5 or TOEFL iBT score of 105 or Pearson Test of English (Academic) score of 72 (or equivalent) is required.

Application Deadline: Applications are accepted until the program is full.

Entry: September

FUNDING:

This is not a funded program.

Students are eligible to apply for scholarships. For more info visit:
