Master of Sustainability	\$20.23	\$21.71	*

LEGEND	DESCRIPTION
WT (Work Term)	Each co-op work term is required to be a minimum of 420 hours in length. The main purpose of the co-op work term is to provide students the opportunity to build and consolidate professional competence in a field of study. Students also grow in maturity, self-assurance, and breadth of understanding. Co-op employers benefit from such a cost-effective hiring means for evaluating future employees.
WT#1, WT#2, WT#3	Refers to a student's work term that they are being hired. A student hired for their 1st work term typically will be paid less than a student that is hired for their 4th work term.
*	denotes that there were no students on a co-op work term at that level from January-April 2023

Overtime pay and overtime hours banked for study time and/or time in lieu are not included in the above figures.
Data for work term 2+ is self-reported by students and represents submissions from a small sample
