Brock University

Brock University's Cool Climate Oenology and Viticulture Institute (CCOVI) is pleased to announce the 2015 Triggs International Premium Vinifera Lecture series. The lecture series presents a leading international viticultural speaker to lend their expertise through vineyard visits and a public lecture on key issues relating to premium vinifera grape production.

2015 Featured Speaker

Glenn McGourty

Viticulture & Plant Science Advisor,
University of California Cooperative Extension

Topic

Cover crops for premium wine grape production— Finding the right mix

Valley Way, Okanagan Falls

Sandwiches, salad and water to be provided—cash bar.

Site 3: 2 p.m. Park Hill Vineyards, 137 Pampas Grass Way, Oliver

Wednesday, Aug. 26—Public Lecture — 7:30 p.m.

Location: PARC, 4200 Highway 97, Summerland

Topic: Cover Crops for premium wine grape production—Finding the right mix

Reception to follow—wine sponsored by Mission Hill, Tinhorn Creek and Quail's Gate wineries.

Cover crop management is a critical component of a premium vineyard system. These influence crop development, vine health and fruit quality for long term productivity, survival, soil structure, nutrient uptake, etc.

The 2015 vineyard tour will focus on cover crop strategies including permanent cover, alternate row management and best methods when establishing new vineyards or replanting within existing ones.

Join us for what will surely be a most informative experience.

All sessions are free, however an RSVP to bcwgc@shaw.ca is required by Aug. 18, 2015.

Details, including speaker's biography and more, are posted at: brocku.ca/ccovi

BASF
The Chemical Company

BASF Canada is a proud sponsor of the lecture series.
