For Immediate Release

September 12, 2006

The Cool Climate Oenology and Viticulture Institute is pleased to present:

“Better Wine for Better Health”

Creina Stockley, Health & Regulatory Information Manager for The Australian Wine Research Institute will give a talk at Brock University on the health benefits of moderate wine consumption to combat the harmful effects of a high fat diet. This talk is open to the public and the admission is free. The date for the talk is Tuesday, September 26th at 7:30, Pond Inlet, Brock University, St. Catharines.

CCOVI and Brock University invite all health and wine writers to attend the talk and to schedule an interview with Creina Stockley following her talk. Please contact David Hulley (below) for scheduling.

Creina Stockley has been with the The Australian Wine Research Institute for the past 15 years. She is actively involved in the preparation of drug and alcohol policy such as the Federal government's National Alcohol Strategy 2005-2009, and is a member of the Federal government's National Drug and Alcohol Research Centre's Young People and Alcohol Project Advisory Group.

In 1997, she was appointed the Australian government representative on the Nutrition and Health Sub commission of the Organization Internationale de la Vigne et du Vin (OIV) and is currently Vice-president of the Nutrition and Wine Expert Group. In 2004, she was appointed as an international advisor to the Center for Wine and Cardiovascular Health, University of Alabama.
