1:30		Konzelmann Estate Winery	Lake Effects
p.m.	Site 3	Host: Eric Pearson	and Impact on
		1096 Lakeshore Rd., NOTL	Cron Maturity

Admission is <u>FREE</u> but <u>RSVP is required</u>: 905-688-5550-1-4652/4949 or e-mail: ccovi@brocku.ca

3:00 p.m. Completion of Vineyard Visits – Thank you to our site hosts

## **Brock University**

Cool Climate Oenology and Viticulture Institute

Date: Thursday, August 25, 2011

<u>Public Lecture</u>: VINE BALANCE 
Ways to accelerate fruit maturity

Location: Academic South <u>216</u>, Brock University **7:30 p.m. / Reception to follow** 

This year's speaker Dr. Glen Creasy will bring a wealth of knowledge as he discusses VINE BALANCE. Glen's background includes a BSc from Cornell University specializing in grapevines, a Masters and PhD at Oregon State University working on grape berry vascular connections and inflorescence necrosis/early bunchstem necrosis.

Glen then joined Charles Sturt University and in 1998 moved on to Lincoln University where he teaches, has a research programme as well as consulting to the industry.

His research interests have always revolved around viticultural management and its effects on grape and wine qualities. "Achieving vine balance is an elusive goal, but should be on the agenda for every season." Glen's recent research has been looking at ways to contribute to this. Join us for what will surely be a most informative lecture.

Admission is FREE. Visit www.brocku.ca/ccovi/ for Glen's bio and cv, site maps for Technical Workshop as well as a campus map for lecture location.

The lecture series was created by Donald and Elaine Triggs to bring a leading international speaker to present a public lecture on key issues related to premium vinifera.
