

# Leadership in Environmental Sustainability Certificate

PROFESSIONAL AND CONTINUING STUDIES

This professional development certificate aims to equip individuals with knowledge about environmental sustainability and advanced skills required to become future change agents in this context. Program highlights include online delivery, flexible timelines, and multiple pathways to completion.

## Curriculum Overview

### Required Courses

- Current State of the Environment
- Enacting Sustainable Environmental Changes

### Elective Courses (co-created with ECC specifically for staff)

- Introduction to Northern Climate Resilience
- Ways to Engage

## Program Structure

Participants in this certificate program will be required to complete two core courses and two elective courses. The elective courses have been co-created with the Government of the Northwest Territories to be tailored to a Northern context.

Core courses are 8 weeks in length and will be offered in the Fall and Winter. Electives are 6 weeks in length and will be offered annually.

All courses are offered entirely online in both real-time and self-guided formats.

## Costs and Registration

This certificate program is a wonderful professional development opportunity for employees working in the field of environmental sustainability.

### Required Course Cost: \$495 per course

- Current State of the Environment (offered Fall 2024)
- Enacting Sustainable Environmental Changes (offered Winter 2025)
