Prepared by:

**Waste Reduction Group Inc** 

Waste Reduction Group Project P1425 April 2024

#### **Executive Summary**

Brock University retained the services of Waste Reduction Group Inc to conduct a solid non-hazardous waste audit at its campus located in St. Catharines, Ontario. A waste audit was conducted during the fall of 2023. Twenty-four hour samples of materials were collected for the waste audit from 30 buildings, consisting of 1868 kg of garbage, 535 kg of mixed recycling and 12 kg of organics. The collected samples were audited over seven (7) days in October and November 2023. Waste materials collected for the audit were tagged to indicate the functional area of the building that generated the waste, including office, public, food service kitchens, food service dining areas, food service tenant areas, washrooms, labs, self-contained residences and outdoor bins. The following summarizes the waste stream compositions determined from the audit:

Material	Garbage Stream	Recycle Stream	Organic Stream
Organic Food Waste	24.0%	3.3%	82.6%
Total Mixed Containers	16.9%	45.3%	0.2%
Total Mixed Papers	16.3%	23.4%	13.7%
Compostable Fibres	12.6%	4.3%	1.7%
Non-recyclable	10.4%	9.6%	0.2%
LDPE Plastic Films	6.0%	3.3%	
Coffee Cups	4.8%	3.6%	1.5%
Food/snack wrappers	3.2%		
Other Paper Drink Cups	2.0%	2.3%	
Office Supplies (Pens, etc)	0.8%		
Take out food packaging	0.6%		
Textiles	0.6%	0.1%	
PPE	0.4%	0.1%	0.1%
Corrugated Cardboard	0.3%	2.6%	
Styrofoam	0.2%	0.3%	
Electronic waste	0.2%		
Scrap Wood	0.2%		
Gloves	0.1%		
Batteries	0.1%		
Lab Glass		1.6%	
Other Plastics		0.2%	
Contamination Rate		29.0%	15.7%

Waste diversion programs have been implemented on campus for cardboard, mixed containers, mixed papers, confidential papers, scrap metals, organics, coffee cups, oil & grease, bulbs & ballasts, electronic wastes, batteries, yard wastes, wood pallets, printer toners, used furniture/clothing donations, lab bottles, LCBO/Beer Store returns, and waste reduction initiatives. Through discussions with Brock U and waste management and recycling service providers, estimates of the annual amounts of solid non-hazardous waste materials disposed and diverted were determined. The following table summarizes the annual quantities of wastes reduced, reused, recycled, composted and disposed in 2023.

## **Annual Quantities Disposed & Diverted**

Material	Total Annual Amount (MT)
Disposed to Landfill	528.69
Materials Reduced	13.06
Materials Reused	18.26
Materials Recycled	584.05
Materials Composted	239.82
Total Waste Generated	1383.88

Based on the total annual amount of waste generated and materials diverted, the waste diversion rate at Brock U was determined to be approximately 62%. Ontario's Waste Free Waste Strategy indicates interim goals of 50% diversion rate by 2030 and 80% by 2050. Brock U's management team are committed to maintaining a high diversion rate and minimizing the amount of materials disposed to landfill.

#### 1 Introduction

Brock University (Brock U) retained the services of Waste Reduction Group Inc to conduct a solid non-hazardous waste audit in 2023 at its campus located in St. Catharines, Ontario. The waste audit examined representative samples of waste (garbage, mixed recycling and organics) from the campus over a seven (7) day period in October and November 2023. The purpose was to gain an understanding of the quantities and composition of solid wastes generated on campus.

Brock U is a multi-building community that has approximately 18,639 full-time equivalent (FTE) students (2022/23) and staff that generate waste and recyclable materials. Refer to Attachment A1, Appendix A for referenced data.

Brock U conducted a solid non-hazardous waste audit to comply with the requirements of O.Reg. 102/94 and to further improve upon their present waste reduction, reuse and recycling programs.

#### 1.1 Purpose

The purpose of the solid non-hazardous waste audit was to:

- Comply with Part X of O.Reg. 102/94 'Waste Audits and Waste Reduction Work Plans', which
  requires the operator of an educational institution with more than 350 students enrolled per
  year, to conduct an annual waste audit and prepare and implement a waste reduction work
  plan (Refer to Appendix A for a partial excerpt of O.Reg.102/94);
- Confirm compliance with Section 14 of O.Reg.103/94 'Industrial, Commercial and Institutional Source Separation Programs' and Part X 'Educational Institutions' of the Schedule attached to the Regulation (Refer to Appendix A for a partial excerpt of O.Reg.103/94).
- Determine the annual waste diversion rate for Brock U resulting from existing waste reduction, reuse, and recycling programs;
- Identify point of generation and quantify composition of wastes at Brock U;
- Identify any additional opportunities for waste reduction and diversion that may exist at Brock U;
- Identify potential cost savings associated with the disposal of solid waste materials; and
- Address any specific concerns or opportunities identified during the study.

## 1.2 Scope of Work

To satisfy the purpose of the waste audit, the following scope of work was completed:

 Collected data pertaining to waste composition and collection practices between October 24<sup>th</sup> and November 1<sup>st</sup>, 2023.

- Determined the total quantity of waste materials diverted from landfill by Brock U through current reduction, reuse, and recycling programs;
- Completed a Waste Audit Report (per MECP protocol) that addressed the amount, nature and composition of the waste, the manner by which the waste was generated, including management decisions and policies that relate to the production of waste, and the way in which the waste is managed on campus; and
- Completed a Waste Reduction Work Plan (per MECP protocol) regarding plans to reduce, reuse
  and recycle waste on campus. The report set out who will implement each part of the plan,
  when each part will be implemented and what the expected results shall be.

#### 2 Methodology

Discussions were held with Brock U personnel to review existing waste management and recycling programs implemented on campus. Based on previous audit experience and information gathered by Brock U, a detailed waste audit schedule was developed. The waste audit was performed over seven (7) day period in October and November 2023, as summarized in Table 1:

**Table 1: Waste Audit Sample Summary** 

Date	Building/Location
Oct. 24, 2023	Walker West/S. Block, Harrison Hall/Kenmore Hall, CUB
Oct. 25, 2023	Welch Hall, Cairns, Plaza-Bookstore, Student Centre, GSB
Oct. 26, 2023	Heritage Place Plaza, BRIC, Outdoor Bins, Marilyn I. Walker School
Oct. 27, 2023	Alphie's, Tower, Thistle, Scotia Bank Hall (SBH)
Oct. 30, 2023	573 Glenridge, East Academic, International Building, Quarry View N&S
	Residences, Gateway Suites
Oct. 31, 2023	Residence 8, Earp Residence, Decew North, DeCew Café, Vallee Residence,
	MacKenzie Chown-Inniskillin
Nov. 1, 2023	Daycare, Lowenberger Residence, Village Residence

In coordination with the Brock U staff, twenty-four hour samples of waste was collected from each of the identified buildings on the audit schedule. Bags of garbage, mixed recycling and organics were collected and tagged with coloured tape describing the functional area within the building that generated the waste material, as summarized in Table 2:

**Table 2: Waste Audit - Functional Area Summary** 

Colour Tag	Functional Areas
Red	Office / Administrative Areas
Blue	Public Areas (Class rooms, lobbies, lounges, libraries, corridors, etc.)
Yellow	Washrooms
Green	Food Services – Kitchens
Purple	Food Services – Dining Areas
Orange	Laboratories
Untagged	Self contained residences
Untagged	Outdoor bins

The tagged bags of wastes were brought to designated collection areas by Brock U staff and placed into temporary plastic pushcarts supplied by Waste Reduction Group. The total bagged weight of all garbage and recyclable materials from each functional area per building were recorded. Refer to Appendix A for a copy of the Scale Calibration Certificate.

Waste materials were then unloaded, sorted into individual material categories, weighted, rebagged and disposed of in the appropriate garbage or recycling bins. Samples were sorted by a qualified two (2) person team from Waste Reduction Group. Some of the materials source separated by Brock U for recycling (i.e. cardboard, organics, ewastes, printer toners, etc) were not collected and categorized during the audit, due to infrequency of generation, however the annual quantity of each material was reviewed and included in the audit results.

Waste material categories were established prior to the audit based on O.Reg.103/94 requirements for source separation at educational institutions, including:

- Aluminum food or beverage cans (including cans made primarily of aluminum);
- Cardboard (corrugated);
- Fine paper;
- Glass bottles and jars for food or beverages;
- Newsprint; and
- Steel food or beverage cans (including cans made primarily of steel).

In addition to these standard categories other important waste streams such as other mixed containers (PET, HDPE, polypropylene, aseptic, gable top), organic wastes, paper towels (includes all compostable fibres and other one-time use paper products), mixed plastics, Styrofoam, coffee cups (including all other one-time paper disposable cups), yard waste, electronic waste (ewaste), scrap wood, scrap metal and special wastes (i.e. batteries, bulbs and ballasts) were included depending on what auditors found in the samples.

#### 3 Waste Audit Results

#### 3.1 Garbage Quantities & Distribution

A key aspect of O. Reg. 102/94 is for waste generators to gain a good understanding of the areas of their operation that generate the most waste, how it is generated, as well as the waste composition. One can use this information to focus their recycling and waste reduction efforts efficiently and effectively.

Figure 1 and Table 3 ranks garbage generated per building based on the audit results.

Figure 1: Brock University 2023 Garbage Generation Distribution

Table 3: Waste Audit - Annual Garbage Generated per Building (Based on 24-hr Sample)

Building Name	Percentage <sup>(1)</sup>	Annual Quantity
	%	Metric Tonnes
Tower	12.32%	65.13
Mackenzie Chown- Inniskillin	9.45%	49.96
Lowenberger Residence	9.16%	48.45
Thistle	8.54%	45.17
Walker West/South Block	5.28%	27.92
Village Residence	5.10%	26.95
Outdoor Bins	4.07%	21.53
Decew North Residence	3.86%	20.40
DeCew Café	3.70%	19.54
QuarryView N&S Residences	3.15%	16.65
Plaza - Bookstore	3.09%	16.36
Cairns	2.91%	15.38
International Bldg	2.87%	15.20
Welch Hall	2.85%	15.08
Gateway Suites	2.79%	14.74
Residence 8	2.67%	14.13
Vallee Residence	2.54%	13.42
Earp Residence	2.39%	12.65
Student Centre	2.36%	12.49

GSB	1.99%	10.55
East Academic	1.82%	9.63
Daycare	1.63%	8.64
573 Glenridge	1.60%	8.44
BRIC	1.34%	7.09
Marilyn I Walker School	1.04%	5.51
CUB	0.51%	2.71
Scotia Bank Hall	0.47%	2.50
Alphie'sTrough	0.29%	1.53
Harrison Hall/Kenmore Hall	0.17%	0.89
Heritage Place Plaza	0.02%	0.09
Total	100.0%	528.69

Note 1: Percentage based on 24-hr garbage sample results from the waste audit.

Therefore, Schmon Tower, Mackenzie Chown- Inniskillin, Lowenberger Residence, Thistle, Walker West/South Block, Village Residence, Outdoor bins, DeCew North Residence, DeCew Café and QuarryView Residences were the most significant generators of garbage on campus, accounting for approximately 65% of the garbage stream sample.

As noted above, a review of Brock U's activities identified the following functional areas within campus buildings:

- Office / Administrative Areas
- Public Areas
- Washrooms
- Food Service Kitchens

- Food Service Dining Areas
- Laboratories
- Self-Contained Residences
- Outdoor Bins

Table 4 ranks garbage generated per building functional area based on the audit results.

Table 4: Waste Audit – Annual Garbage Generated per Functional Area

Functional Area	Percentage <sup>(1)</sup>	Annual Quantity
	%	Metric Tonnes
Public Areas	28.6%	151.25
Residences	22.4%	118.57
Unlabelled Bags	11.0%	58.02
Food Services - Kitchens	10.2%	53.82
Washrooms	8.5%	44.81
Food Services - Dining	7.4%	39.08
Office & Admin	5.3%	28.15
Outdoor Bins	4.1%	21.53
Labs	2.5%	13.47
Total	100.0%	528.69

Note 1: Percentage based on 24-hr garbage sample results from the waste audit.

Therefore, public areas, self-contained residences, unlabelled and food services — kitchens generated the most garbage on campus, accounting for approximately 72% of the garbage stream.

#### 3.2 Garbage Composition

The total weight of garbage collected and sorted for the Fall 2023 waste audit was approximately 1321 kg. In 2015, a summer waste audit was also conducted to estimate garbage composition during the summer period in order to account for seasonal variability. Figure 2 summarizes the overall combined garbage composition from the 2023 fall waste audit and 2015 summer waste audit.

Figure 2: Brock University Overall Garbage Composition

## 3.2.1 Fall Garbage Composition

The total weight of waste collected and sorted for the fall audit was 1320.54 kg. Figure 3 summarizes the overall fall waste composition of the audited sample:

Figure 3: Brock University 2023 Fall Garbage Composition

Summary tables for each building per waste generation functional area, including waste composition, weights and percentages, are included in Appendix B.

Table 5 summarizes the largest primary categories (i.e. >5%) of waste materials per generation area (based on the total combined amount of garbage audited):

Table 5: Waste Audit - Primary Waste Categories per Generation Area

Waste Generation Area	Percent of Sample (By Weight)	Organics	Compostable Fibres	Mixed Containers	Mixed Papers	Non-recyclable	Plastic Films	Coffee Cups	Food/Snack Wrappers
Public Areas	30.1%	29.9%	8.2%	17.0%	16.6%	6.6%	5.4%	7.0%	
Residences	20.0%	25.1%	11.9%	17.2%	17.9%	11.0%	9.4%		
Unlabelled	13.3%	13.8%	7.4%	15.9%	15.6%	19.7%			12.3%
Food Services Kitchens	9.1%	27.3%	8.5%	31.5%	10.8%	7.6%	7.7%		
Washrooms	8.4%	5.4%	51.6%	6.5%	7.9%	9.7%			
Office & Admin	6.7%	11.9%	10.4%	21.0%	21.0%	11.9%	5.7%	7.2%	
Food Services Dining	6.6%	46.3%	6.5%	12.7%	25.2%				
Outdoor Bins	3.6%	32.8%	6.3%	8.8%	18.8%	14.6%		9.5%	
Labs	2.3%	7.8%	15.0%	13.7%	12.4%	30.2%	8.3%		
Total	100.0%	24.0%	12.6%	16.9%	16.3%	10.4%	6.0%	<5%	<5%

Organic food wastes were found in high quantities in most areas that were audited. Based on the waste audit results, it was estimated that approximately 24.0% of solid waste disposed to landfill consisted of organic materials, representing 127.0 MT annually. Organic content was especially high in dining areas, outdoor bins and public areas. An organics program is implemented on campus. It is recommended that Brock U focus attention on organics diversion in this area in order to capture and divert more organic materials from landfill.

High amounts of mixed containers and mixed papers were found in the garbage stream from most areas of the university. Based on the waste audit results, it was estimated that approximately 16.9% and 16.3% of solid waste disposed to landfill consisted of mixed containers and mixed papers respectively (or approximately 89.6 MT and 86.3 MT annually). Brock U has implemented recycling programs for mixed papers and mixed containers. Results suggest that better collection systems, improved labels, program promotion and/or student/employee/cleaner education may be required to capture more of these materials.

Compostable fibres were found in fairly high quantities in most of the audited areas. Based on the waste audit results, it was estimated that approximately 12.6% of solid waste disposed to landfill consisted of compostable fibres, or approximately 67 MT annually. Paper towels content was especially high in garbage streams from washroom areas. Brock U may want to investigate the feasibility of implementing a diversion program for paper towels. Often paper towels can be mixed with cardboard or organic programs depending on vendor specifications.

#### 3.2.2 Summer Garbage Composition

Refer to Brock U's 2015 Waste Audit Report (Waste Reduction Group Project P0525, dated February 2016) for details regarding Brock U's summer garbage composition.

#### 3.2.3 Office/Administrative Areas

Based on the Fall 2023 garbage stream audited from office/administrative areas, the largest primary categories of waste generated were as follows:

0	Mixed Papers:	26.6%
0	Organics:	16.8%
0	Compostable Fibres:	14.7%
0	Residual Materials:	10.5%

The percentage of mixed papers was high especially since a recycling program has been implemented for this material. Results suggest that improved collection systems, signs, program promotion and/or staff/cleaner education may be required to capture more of these materials. The organics and compostable fibre content was quite high and suggests that staff eat meals at their desks. Brock U may wish to focus on placing more organic bins in office areas.

Office/Administrative Areas in the following buildings were found to generate the most garbage compared to all office/administrative areas that were audited:

0	International Building:	23.3%
0	Mackenzie Chown- Inniskillin:	16.3%
0	Tower:	11.0%
0	GSB:	9.1%

#### 3.2.4 Public Areas

Based on the Fall 2023 garbage stream from public areas, the largest primary categories of waste generated were as follows:

0	Organics:	35.3%
0	Mixed Papers:	17.3%
0	Mixed Containers:	13.1%
0	Compostable Fibres:	9.7%

The percentage of organic materials and paper towels was quite high. Brock U may wish to investigate the feasibility of adding some organics bins in busy public areas. The percentages of mixed papers and mixed containers were fairly high, especially since recycling programs have been implemented for these materials in public areas. Results suggest that better collection systems, improved signs, program promotion and/or staff/student education may be required to improve the capture rate of these materials.

Public Areas in the following buildings were found to generate the most garbage compared to all public areas that were audited:

0	Schmon Tower:	17.7%
0	Outdoor Bins:	12.4%
0	Thistle:	10.9%

#### 3.2.5 Washrooms

Based on the Fall 2023 garbage stream audited from washroom areas, the largest primary categories of waste generated were as follows:

0	Compostable Fibres:	57.0%
0	Non-Recyclable:	8.9%

The percentage of compostable fibres was high in washroom waste. Brock U may wish to investigate the feasibility of implementing a paper towel recycle program, or replacing paper towels in washrooms with reusable hand towels or hand dryers. Often, paper towels can be included with organic or cardboard recycle programs.

Washrooms in the following buildings were found to generate the most garbage compared to all washrooms that were audited:

0	Walker West/South Block:	22.6%
0	Tower:	21.5%
0	Thistle:	11.8%

#### 3.2.6 Food Service – Kitchen Areas

Based on the Fall 2023 garbage stream audited from food service kitchen areas, the largest primary categories of waste generated were as follows:

0	Total Mixed Containers:	31.5%
0	Organic Material:	27.3%
0	Total Mixed Papers:	10.8%
0	Compostable Fibers:	8.5%

The percentages of mixed papers and mixed containers were fairly high, especially since recycling programs have been implemented for these materials on campus. Results suggest that better collection systems, improved signs, program promotion and/or staff/student education may be required to improve the capture rate of these materials. The percentages of organics and compostable fibres were also high in kitchen waste. Brock U may wish to investigate the feasibility of expanding the organic 3Rs program, implementing a paper towel 3Rs program or blending organic food wastes with paper towels (depending on hauler requirements).

Food Service Areas in the following buildings were found to generate the most garbage compared to all food service kitchen areas that were audited:

0	Lowenberger Residence:	54.4%
0	DeCew Cafe:	29.3%

#### 3.2.7 Food Service – Dining Areas

Based on the Fall 2023 garbage stream audited from food service dining areas, the largest primary categories of waste generated were as follows:

0	Organics:	43.6%
0	Total Mixed Papers:	25.2%
0	Total Mixed Containers:	12.7%

The percentage of organics was very high, especially since an organics 3Rs programs has been implemented in dining areas. Results suggest that better collection systems, improved signs, program promotion and/or staff/student education may be required to improve the capture rate of these materials. Focus should also be placed on diverting more papers and containers from dining areas.

Food Service Dining Areas in the following buildings were found to generate the most garbage compared to all food service dining areas that were audited:

0	Schmon Tower:	46.5%
0	Thistle:	44.0%

#### 3.2.8 Laboratories

Based on the total amount of waste audited from lab areas, the largest primary categories of waste generated were as follows:

0	Non-Recyclable:	30.2%
0	Compostable Fibres:	15.0%
0	Mixed Containers:	13.7%
0	Mixed Papers:	12.4%

The percentage of compostable fibres was high. Brock U may wish to investigate the feasibility of implementing a paper towel recycle program. The percentages of mixed papers and mixed containers were quite high. Results suggest that better collection systems, improved labels, program promotion and/or staff/student education may be required to improve the capture rate of this material.

Lab areas in the following buildings were found to generate the most garbage compared to all labs that were audited:

0	Cairns:	84.1%
0	Welch Hall:	15.2%

#### 3.2.9 Residences

Based on the total amount of waste audited from residences, the largest primary categories of waste generated were as follows:

0	Organics:	25.1%
0	Mixed Papers:	17.9%
0	Mixed Containers:	17.2%
0	Compostable Fibres:	11.9%

The percentage of organics was high in the garbage from residences. Focus should also be placed on diverting more organic food wastes and compostable fibres from residences. The percentages of mixed papers and mixed containers were also quite high. Results suggest that better collection systems, improved labels, program promotion and/or staff/student education may be required to improve the capture rate of these materials.

The following residences were found to generate the most garbage:

0	Village Residence:	22.7%
0	Quarry View N&S Residence:	14.0%
0	DeCew North Residence:	13.7%

#### 3.2.10 Outdoor Bins

Based on the total amount of waste audited from outdoor bins, the largest primary categories of waste generated were as follows:

0	Organics:	32.8%
0	Mixed Papers:	18.8%
0	Residual Materials:	14.6%
0	Coffee Cups:	9.5%

The percentages of organics and mixed papers were very high. Results suggest that improved labels, program promotion and/or staff/student education may be required to improve the capture rate of papers.

#### 3.3 Garbage Composition per Building

Figure 4 summarizes the overall garbage composition determined for each building based on 24-hour sample results.

## 3.4 Percentage of Recyclables in Garbage

O.Reg. 103/94 requires that educational institutions source separate the following materials (at a minimum):

- Aluminum food or beverage cans (including cans made primarily of aluminum);
- Cardboard (corrugated);
- Fine paper;
- Glass bottles and jars for food or beverages;
- Newsprint; and
- Steel food or beverage cans (including cans made primarily of steel).

Figure 5 summarizes the quantity of these mandatory recyclable materials compared to other recyclable and non-recyclable materials found in the 2023 waste audit samples.

Figure 5: Percentage of Recyclable in Garbage

BrockU has a 'mandatory' recyclable content of 6.5% in the combined garbage of the university. The main 'mandatory' recyclable materials were fine papers and aluminum containers. 'Other Recyclables' represented 75.8% of the sample and consisted mainly of compostable materials (organics and compostable fibres) and non-mandatory recyclable paper fibres. Non-recyclables represented approximately 17.8% of the sample.

# 3.5 Recyclable Material Distribution

Samples of source separated recyclables were collected from various functional areas on campus during the fall waste audit period. Table 6 ranks recyclable materials generated per building functional area based on the waste audit results.

Functional Area	24-h Sample Quantity	Percentage
	kg	%
Residences	219.53	41.0%
Food Services - Kitchens	193.77	36.2%
Public Areas	76.23	14.2%
Outdoor Bins	28.21	5.3%
Labs	8.66	1.6%
Food Services - Dining	8.30	1.6%
Office & Admin	0.62	0.1%
Washrooms	0.12	0.0%
Total	535.44	100.0%

Therefore, self-contained residences, food services – kitchens and public areas generated the most recyclables on campus, accounting for approximately 91% of the recycle stream.

# **Recyclable Material Composition**

The total weight of recyclables collected and sorted for the audit was 535.44 kg. Figure 6 summarizes the overall composition of the audited sample. The recyclable sample had a contamination rate of 29.0%, which is relatively consistent with the contamination rate determined in 2022 (i.e. 27.6%). Materials contributing to the contamination included coffee cups, compostable fibres, organics and non-recyclable items.

45.3% 23.4% 0.3% 9.6% 2.6% 3.3% 4.3% 3.3% 3.6% 2.3% ■ Total Mixed Containers ■ Total Mixed Papers ■ Non-recyclable ■ Compostable Fibres □ Coffee Cups Organic Food Waste ■LDPE Plastic Films ■ Corrugated Cardboard Other Paper Drink Cups ■ Lab Glasss ■ Styrofoam ■ Other Plastics

**Figure 6: Recyclable Material Composition Summary** 

Summary tables for each building per waste generation functional area, including waste composition, weights and percentages, are included in Appendix B.

#### **Organic Material Distribution** 3.7

Samples of source separated organics were collected from various functional areas on campus during the fall waste audit period. Table 7 ranks recyclables generated per building functional area based on the waste audit results.

Table 7: Waste Audit – Organics Generated per Functional Area

	•	
Functional Area	24-h Sample Quantity	Percentage
	kg	%
Food Service - Kitchens	11.16	89.6%
Public Areas	1.14	9.1%
Washrooms	0.16	1.3%
Total	12.46	100.0%

Therefore, food services – kitchens generated the most organics on campus, accounting for approximately 90% of the organic stream sample.

#### 3.8 **Organic Material Composition**

The total weight of organics collected and sorted for the audit was 12.46 kg. Figure 7 summarizes the overall composition of the audited sample. The organic sample had a contamination rate of 15.7%. Materials contributing to the contamination mainly included mixed papers.

82.6% 0.2% 13.7% ■ Organic Food Waste □ Total Mixed Papers □ Compostable Fibres □ Coffee Cups ■ Total Mixed Containers □ Non-recyclable

**Figure 7: Organic Material Composition Summary** 

Summary tables for each building per waste generation functional area, including waste composition, weights and percentages, are included in Appendix B.

#### 4 Diversion Programs & Waste Systems

#### 4.1 Waste Diversion Programs

Recycling programs have been initiated at Brock U to recycle/reuse/compost a wide range of materials as described below.

<u>Cardboard</u>: Cardboard recycling is provided across campus. Cardboard boxes are flattened and placed in large receptacles or smaller totes. Cardboard is brought by Brock U staff to their on-site baler. Cardboard bales are serviced by Cascades. Some front-end service is also provided by Modern.

<u>Mixed Containers</u>: Mixed containers include assorted plastics food and beverage containers (PET, HDPE, LDPE, PP, and PS), aluminum and metal cans, glass food and beverage containers, and aseptic containers (gable top containers, tetra paks, etc). Mixed containers are collected throughout campus in dedicated recycle depots, primarily concentrated in high waste generating areas. Collected materials are disposed into front-end bins or 95 gallon totes by Brock U staff. Bins are serviced by Modern.

<u>Mixed Papers</u>: Mixed papers include a range of items such items as (but not limited to) newspapers, fine papers, envelopes, magazines, brochures, boxboard, packing paper, shipping/receiving supplies, paper bags and other clean food paper products. Mixed papers are collected throughout campus in dedicated recycle depots, primarily concentrated in high waste generating areas. Collected materials are disposed into front-end bins or 95 gallon totes by Brock U staff. Bins are serviced by Modern.

<u>Confidential Papers</u>: Confidential papers are collected mainly in office/administrative areas in secure consoles or totes. Consoles were serviced by private contractor on a weekly basis. All shredded materials were recycled.

<u>Scrap Metals</u>: Recyclable ferrous metals are collected at the CUB by Brock U staff. Larger pieces of metal recovered through the repair and recovery of broken and old equipment are deposited in a lugger box. Scrap metal recycling service is provided by RAM Metal Recycling.

<u>Organics</u>: Organic based food waste is collected at the following locations for composting: Alumni Center, Cairns, CUB, DeCew Dock, Inniskillen Hall, International Centre, Lowenberger, Tower Dock and Walker Complex. Organic waste is mainly generated from the preparation of food. Scrap materials are placed in 32 gallon or 64 gallon totes provided by Davidson Environmental. Organic waste from various food vendors is also placed in receptacles at the back of the Tower complex. Davidson Environmental services the organic bins up to six days per week. An organics pulping unit is installed in the newly renovated market cafeteria in the Tower Complex.

<u>Coffee Cups</u>: Coffee cups are collected on campus in specified recycle containers. Brock U added new dedicated coffee cup recycle bins in 2016, bringing the total on campus to eight. Bagged coffee

cups are collected by Davidson Environmental on a weekly basis. The coffee cups are to be shredded and blended into the composting organic materials, acting as a bulking agent.

<u>Oil & Grease</u>: Oils & greases are collected from food service areas across campus, and stored in dedicated containers. Service is provided by Rothsay as required.

<u>Bulbs & Ballasts</u>: Fluorescent bulbs and ballasts are collected across campus and stored in dedicated totes. Service is provided by Aevitas as required.

<u>Electronics/Ewastes</u>: Electronic wastes are collected across campus and stored in dedicated locations. Service was provided by Greentec as required.

<u>Batteries</u>: Batteries are collected in small dedicated containers across campus. Collected batteries are stored in dedicated totes. Service is provided by Raw Materials Company Inc as required.

<u>Yard Wastes</u>: Yard wastes are collected across campus during the various seasons of the year. Approximately six (6) 40-yd roll-off bins of loosely packed yard wastes are recycled/composted per year. Additional yard wastes were managed by Modern in 2022.

<u>Wood Pallets</u>: Wood pallets/skids are returned to suppliers or removed for reuse. Based on discussions with Brock U, pallets are removed on a weekly basis.

<u>Printer Toner Cartridges</u>: Brock U's Printing Services returns all empty toner bottles from the new MFD (Multi Functional Devices) to Xerox for recycling. It is estimated that approximately 200 bottles per year are recycled. Printer toner cartridges are collected from various areas across campus and sent to private contractor to be processed.

<u>Used Furniture</u>: Brock U collected and stored used furniture for on-campus reuse or for donations to local charities.

<u>Amber Bottles</u>: Labs on campus have implemented an in-house reuse program. The quantity of amber bottles collected for reuse was unknown.

<u>Scrap Woods</u>: A scrap wood program was implemented on-site in 2013 at the CUB. Due to the infrequent use of the bin, the service was cancelled in 2014.

<u>LCBO/Beer Store Returns</u>: Brock U returns glass beer, wine and spirit bottles via the LCBO/Beer Store return program.

<u>Water Bottle Filling Stations</u>: Brock U added new water bottle refilling stations on campus. These stations help the university reduce the amount of plastic water bottles used on campus. The program kept approximately 241,210 water bottles from landfill in 2022.

<u>Textbook Collection:</u> BrockU collects textbooks as required, all of which are donated, repurposed and/or recycled.

Table 8 summarizes the annual amount of waste diverted from landfills due to waste diversion programs implemented at Brock U.

**Table 8: Waste Audit - Annualized Waste Diversion Summary** 

Waste Material	Reused or Recycled	Total Diversion	
		Metric Tonnes	
Cardboard	Recycled	70.02	
Mixed Recycling	Recycled	323.71	
Mixed Containers	Recycled	19.43	
Mixed Papers	Recycled	46.62	
Confidential Papers	Recycled	14.21	
Scrap Metals	Recycled	45.31	
Organics	Recycled/Composted	198.31	
Coffee Cups	Recycled/Composted	0.62	
Oil & Grease	Recycled	3.77	
Bulbs & Ballasts	Recycled	0.20	
Electronic wastes	Recycled	16.23	
Batteries	Recycled	1.44	
Yard Wastes	Recycled/Composted	40.88	
Wood Pallets	Reused	1.48	
Printer Toners	Reused	0.03	
Used Furniture/Equipment	Reused	5.41	
Amber Bottles (Labs)	Reused	Unknown	
LCBO/Beer Bottle Returns	Reused	11.34	
Construction	Recycled	43.01	
Clothing Donations	Reused	0.10	
Water Bottle Filling Stations	Reduced	13.06	
Total Waste Material Diverted		855.18	

Therefore, the total amount of waste material diverted from landfill in 2023 was estimated to be approximately 855 metric tonnes. Evidence of annual quantity data obtained from Brock U and/or service providers is provided in Appendix A. Waste diversion programs implemented at Brock U exceed the requirements of O.Reg.103/94 for educational institutions.

#### 4.2 Waste Disposal Systems

Regular solid non-hazardous waste is collected across campus by Brock U staff and placed in either front-end bins or compactors located in designated waste handling areas. A summary of front-end bins and compactors is provided in Appendix A. Modern Corporation is responsible for the collection of waste weekly depending on the waste generating area. The total quantity of solid non-hazardous waste disposed to landfill in 2023 was estimated to be approximately 528.69 metric tonnes.

Please note that the Modern garbage summary attached in Appendix A uses an assumed waste density of 60 kg/yd<sup>3</sup>. This value was replaced with Brock U's site specific density of 26.53 kg/yd<sup>3</sup> that was determined in 2014.

In 2014, Brock U conducted two density tests with Modern to better estimate the density of garbage generated on-site. The tests were conducted in April and the summer of 2014. These were done by conducting a garbage collection run at the university, noting what bins were picked up, and knowing the initial and final weight of the collection truck. The densities were combined with 2013 density study results for an average of 26.53 kg/yd<sup>3</sup>. Since not all garbage bins are 100% full for each collection run, the calculated average density of 26.53 kg/yd<sup>3</sup> includes a utilization factor to adjust for bins not completely full. The densities found from the various density studies are consistent with other institutions that have implemented recycling programs similar to Brock U and achieve a high waste diversion rate. It is recommended that Brock U conduct a follow-up waste density test in 2021 to confirm the campus garbage density determined in 2014.

In addition to front-end service, Brock U has two (2) compactors located on campus. These include one (1) 35-yd<sup>3</sup> unit at Schmon Tower and one (1) 8-yd<sup>3</sup> unit at Central Receiving. The 35-yd<sup>3</sup> compactor is weighed prior to disposal. Weights of the Central Receiving compactor was estimated based on the number of pick-ups, campus garbage density and a 3:1 compaction ratio.

#### 5 Performance Metrics

#### 5.1 Waste Diversion Rate

Waste Diversion Rate is the percentage of waste materials that a facility diverts from landfill due to reduce, reuse and recycling (i.e. 3Rs) programs versus the total amount of waste generated (i.e. 3Rs plus disposed). According to the MECP, Waste Diversion Rate is calculated as follows:

$$Waste\ Diversion\ Rate = \frac{Total\ Waste\ Diverted\ (3Rs)}{Total\ Waste\ Generated} * 100\%$$

Based on the total annual amount of waste generated and materials diverted, the 2023 waste diversion rate at Brock U was determined to be approximately 61.8%. Table 9 and Figure 8 summarize the quantities of wastes diverted (via 3Rs programs) and disposed. Ontario's Waste Free Waste Strategy indicates interim goals of 50% diversion rate by 2030 and 80% by 2050.

61.8%

Material	Total Annual Amount (MT)	
Disposed to Landfill	528.69	
Materials Reduced	13.06	
Materials Reused	18.26	
Materials Recycled	584.05	
Materials Composted	239.82	
Total Waste Generated	1383.88	

**Table 9: Annual Quantities of Materials Diverted and Disposed** 

**WASTE DIVERSION RATE** 

## 5.2 Capture Rate

Capture rate is the proportion of divertible waste materials which are successfully diverted from disposal compared to the total amount of the divertible waste materials generated. According to the Recycling Council of Ontario, Capture Rate is calculated as follows:

$$Capture\ Rate = \frac{Total\ Divertible\ Material\ Captured\ (3Rs)}{Total\ Divertible\ Material\ Generated} * 100\%$$

Thus, capture rate assists in determining the effectiveness of recycling programs. Table 10 summarizes the capture rate for the main divertible materials at Brock U.

**Table 10: Capture Rate Summary** 

Divertible Material	Annual Material	Annual 3Rs Quantity	Capture Rate
	Generated	Captured	Percent
	Metric Tonnes	Metric Tonnes	
Cardboard	71.83	70.02	97.5%
Mixed Containers	199.97	110.39	55.2%
Mixed Papers	365.69	279.36	76.4%
Confidential Papers	14.21	14.21	100.0%
Scrap Metals	45.42	45.31	99.8%
Organics	325.33	198.31	61.0%
Coffee Cups	26.21	0.62	2.4%
Oil & Grease	3.77	3.77	100.0%
Bulbs & Ballasts	0.20	0.20	100.0%
Ewastes	17.37	16.23	93.5%
Batteries	1.91	1.44	75.2%
Yard Wastes	40.88	40.88	100.0%
Wood Pallets	1.48	1.48	100.0%
Printer Toners	0.03	0.03	100.0%
Used Furniture/Equipment	5.51	5.51	100.0%
LCBO/Beer Bottle Returns	11.34	11.34	100.0%
Construction	43.01	43.01	100.0%
Water Bottle Filling Stations	13.06	13.06	100.0%
Overall Facility	1187.22	855.18	72.0%

Capture rates of most materials are high ranging from approximately 60% to 100%. Coffee cups and mixed containers had the only values less than 60%, being approximately 2.4% and 55.2% respectively. The overall capture rate of all recyclables on campus is considered to be fairly high at 72%.

#### 5.3 Year over Year Change in Waste Generation

Waste diversion rate and capture rate do not always demonstrate how effective a site's 3R programs are operating. This is due to the continual change of many important factors involved in waste and recyclable material generation on campus, such as number of students enrolled, floor area of buildings, etc. As student numbers change or more buildings are added to the campus, quantities of waste and recyclables change making it difficult to have a direct comparison of data between years. In 2012, Brock U start tracking 'Year over Year' changes in the amount of wastes disposed and/or materials recycled per standard unit. This allows direct comparison of data from year to year, thus assisting the university in gaining an understanding of the effectiveness of their 3Rs programs. For Brock U, the most applicable standard unit is Full-time equivalent students, or FTE.

#### 5.3.1 Year-over-Year Change in 3Rs Quantities

The 'Year-over-Year Change in 3Rs Quantities' is the indicator of the amount of materials diverted from disposal through reduce, reuse and/or recycle activities per FTE compared to previous data.

Table 11 summarizes the results for the 2023 year compared previous years. A positive year-over-year change indicates 3Rs programs are improving over time.

Table 11: Yr-over-Yr Change in 3Rs Quantities

Period	Total 3Rs (MT)	FTE	Annual 3Rs	Yr-over-Yr Change
			Quantity (kg/FTE)	in 3Rs Quantity
				(kg)
2011	1267.8	15905.1	79.7	
2012	1316.7	16386.9	80.4	+0.7
2013	1266.3	16714.8	75.8	-4.6
2014	1237.1	17139.4	72.2	-3.6
2015	1392.4	17217	80.9	+8.7
2016	1383.1	16957	81.9	+1.0
2017	1372.1	17215.8	79.7	-2.2
2018	1459.7	17419.5	83.8	+4.1
2019	1688.9	17419.5	97.0	+13.2
2020	614.05	17801	34.5	-62.5
2021	750.84	17801	42.2	+7.7
2022	877.62	19131	45.9	+3.7
2023	855.18	18639 <sup>(1)</sup>	45.9	

Note 1: FTE = 18639 for 2022/23 Period.

Caution should be used when interpreting 2020, 2021 and 2022 data due to the unique challenges caused by the COVID-19 pandemic response.

#### 5.3.2 Year-over-Year Change in Garbage Disposed

The 'Year over Year Change in Garbage Disposed' is the indicator of the amount of reduction in waste materials disposed to landfill due to reduction, reuse and recycling activities on campus. Table 12 summarizes the results for the 2023 year compared to pervious years. A reduction in the year over year value will indicate the university is continually reducing wastes disposed to landfill.

Table 12: Yr-over-Yr Change in Garbage Disposed

		•		ı
Period	Total Materials	FTE	Annual Disposed	Yr-over-Yr Change
	Disposed to		Quantity (kg/FTE)	in Disposed
	Landfill (MT)			Quantity (kg)
2011	470.0	15905.1	29.6	
2012	868.2	16386.9	52.9	+23.3
2013	673.7	16714.8	40.3	-12.6
2014	643.5	17139.4	37.5	-2.8
2015	640.3	17217	37.2	-0.3
2016	674.9	16957	39.8	+2.6
2017	538.5	17215.8	31.3	-8.5
2018	530.7	17419.5	30.5	-0.8
2019	739.8	17419.5	42.5	+12.0
2020	208.45	17801	11.7	-30.8
2021	147.47	17801	8.3	-3.4
2022	432.41	19131	22.6	+14.3
2023	528.69	18639 <sup>(1)</sup>	28.4	+5.8

Note 1: FTE = 18639 for 2022/23 Period.

Caution should be used when interpreting 2020, 2021 and 2022 data due to the unique challenges caused by the COVID-19 pandemic response.

#### 6 Changes at Brock U in 2023

In 2023, Brock U continued to improve all existing waste diversion programs implemented on-site. Mixed recycling service was provided by Niagara Recycling until April 2023, and by Modern for the remainder of the year.

#### 7 Waste Audit Summary & Waste Reduction Work Plan

Refer to Appendix C and Appendix D for the Waste Audit Summary and the Waste Reduction Work Plan respectively. The last page of each set of forms in the appendices need to be signed by an authorized person at the University. According to O.Reg. 102/94, the Waste Reduction Work Plan (Appendix D) or a summary of the plan must be posted at the University in a place where staff/students can review it. If a summary is posted, the entire Work Plan should also be made available for review by any staff/student upon request.

# 8 Conclusions & Recommendations

Based on the results of the solid non-hazardous waste audit conducted for Brock U, the following conclusions can be made. Recommendations presented below are intended to assist Brock U in maximizing their waste diversion potential.

In 2023, Brock U disposed of approximately 528.69 tonnes of solid waste in landfills.
 Approximately 855.18 tonnes of waste materials were diverted through existing reduce, reuse and recycling activities. This represents a waste diversion rate of approximately 62%. Ontario's

Waste Free Waste Strategy indicates interim goals of 50% diversion rate by 2030 and 80% by 2050.

- Brock U maintains diversion programs for cardboard, mixed containers, mixed papers, confidential papers, scrap metals, organics, coffee cups, oil and grease, bulbs and ballasts, electronic wastes, batteries, yard wastes, wood pallets, printer toners, used furniture/equipment donations, amber bottles (labs), LCBO/Beer Store returns, clothing donations, textbook reuse/recycling and reductions due to water bottle refilling installations.
- Waste diversion programs implemented at Brock U exceed the source separation requirements of O.Reg.103/94 for educational institutions.
- In total, 1868.44 kg of waste materials were collected and sorted for the waste audit. The sample consisted of 70.7% garbage, 28.7% recycling and 0.7% organics.
- Based on the results of the 2023 waste audit, Schmon Tower, Mackenzie Chown- Inniskillin, Lowenberger Residence, Thistle, Walker West/South Block, Village Residence, Outdoor bins, DeCew North Residence, DeCew Café and QuarryView Residences were the most significant generators of garbage on campus, accounting for approximately 65% of the garbage sample.
- Based on the results of the 2023 waste audit, public areas, self-contained residences, unlabelled
  and food services kitchen areas generated the most garbage on campus, accounting for
  approximately 72% of the garbage stream.
- Brock U has a 'mandatory' recyclable content of 6.5% in the combined garbage of the university.
  The main 'mandatory' recyclable materials were fine papers and aluminum containers. 'Other
  Recyclables' represented 75.8% of the sample and consisted mainly of compostable materials
  (organics and compostable fibres) and non-mandatory recyclable paper fibres. Non-recyclables
  represented approximately 17.8% of the sample.
- Capture rates of most materials are high ranging from approximately 60% to 100%. Coffee cups and mixed containers had the only values less than 60%, being approximately 2.4% and 55.2% respectively. The overall capture rate of all recyclables on campus is considered to be fairly high at 72%.
- Based on the waste audit results, it was estimated that approximately 24.0% of solid waste disposed to landfill (or approximately 127 MT annually) consisted of organic materials (i.e. food wastes). An organics compost program exists at Brock U in some designated areas. The results suggest that improved and/or expanded collection systems, improved signage, program promotion and/or student/staff education programs may be required to improve the capture rate of this material. Organics are not a mandatory recyclable material per O.Reg.103/94.
- Based on the waste audit results, it was estimated that approximately 16.9% of solid waste disposed to landfill (or approx. 89.6 MT annually) consisted of mixed containers (aluminum cans, glass jars, plastic bottles, tetra packs, milk cartons, etc). A mixed recycling 3Rs program exists at Brock U. This data suggests that improved collection systems, labels, program promotion and/or student/staff education programs may be required to improve the capture rate of this material. Glass, steel and aluminum food and beverage containers are mandatory recyclables per O.Reg.103/94.

- Based on the waste audit results, it was estimated that approximately 16.3% of solid waste disposed to landfill (or approx. 86.3 MT annually) consisted of mixed papers (fine papers, newsprint, boxboard, etc). A mixed recycling 3Rs program exists at Brock U. This data suggests that improved collection systems, labels, program promotion and/or student/staff education programs may be required to improve the capture rate of this material. Fine paper and newsprint are mandatory recyclables per O.Reg.103/94.
- Based on the waste audit results, it was estimated that approximately 12.6% of solid waste disposed to landfill (or approximately 67 MT annually) consisted of compostable fibres. Brock U may wish to investigate the feasibility of implementing a paper towel 3Rs program, or replacing paper towels in washrooms with reusable hand towels or hand dryers. Often, paper towels can be included with organic or cardboard recycle programs depending on hauler requirements. Paper towels are not a mandatory recyclable per O.Reg.103/94.
- Based on the 24-hr recycling sample collected for the waste audit, self-contained residences, food services kitchens and public areas generated approximately 91% of the recycle stream. Approximately 71% of the recycle sample consisted of mixed containers (45.3%), mixed papers (23.4%) and cardboard (2.6%). The recycle stream sample had a contamination rate of approximately 29.0%, comprised mainly of non-recyclable items, compostable fibres, coffee cups and organics.
- Based on the 24-hr organic sample collected for the waste audit, food services kitchens generated approximately 90% of the organic sample. Approximately 84.3% of the organic sample consisted of compostable materials. The organic stream sample had a contamination rate of approximately 15.7%, comprised mainly of mixed papers.
- It is recommended that Brock U continue to conduct studies to verify the density of wastes disposed to landfill. This includes verification of the weight of the Central Shipping compactor loads.
- It is recommended that a study be conducted to verify mixed container and mixed paper tote weights as well as to conduct an inventory of bins on-campus. It is recommended that the total number of totes picked-up per week be verified.
- It is recommended that a study be conducted to verify organic tote weights as well to conduct
  an inventory of bins on-campus. It is recommended that the total number of totes picked-up
  per week be verified.
- It is recommended that Brock U conduct studies to add and improve reduction and reuse
  weights to improve the university's diversion rate. For example, reduction credits can include
  reduced coffee cup weight disposed to landfill due to the implementation of a reusable coffee
  mug program on campus or reduced paper weight due to double-sided photocopiers operating
  on campus.
- Continue to use dedicated receptacles as part of a collection program. They should be made available at each location to assist students and staff in disposing of the waste materials accordingly at source.
  - Receptacles should include color coordination to identify the type of waste (i.e., green for organics/compost, blue for recycling, and black for garbage).

- > Receptacles should be sized accordingly based on the type of activity or use.
- ➤ An example of dedicated, color-coded receptacles is provided below:

 Continue to provide clear signage with pictures/graphics to assist students and staff in identifying opportunities for proper disposal at the source. This can also assist students and staff to identify their specific waste materials. This will help improve material capture rates. Examples of signage include the following:

- Promote a culture of waste diversion through education on the importance of waste diversion and communicate the corporate goals for waste diversion and sustainability. Create a positive message around the benefits of waste diversion, and the role that the individual plays. Set achievable goals and metrics, track year-over-year changes in waste diversion, capture rates and communicate progress to staff to encourage further participation/engagement.
- It is important that all staff and students at Brock U be made aware of all available recycling programs. Brock U staff should provide easy access to contact information for questions and/or help regarding the various recycling programs. The recycling programs should have as much consistency as possible across campus.

- Continuous monitoring and reporting for this site annually and comparison with year-over-year
  changes would provide insight into trends, which can then be used as a basis for policy decisions
  regarding solid waste management for future projects. Further refinements to programs and
  processes canbe made and adherence to provincial requirements can be achieved.
- Support and encourage the purchase and use of "environmentally friendly", reusable or recyclable materials and packaging, and/or those that contain recycled content.
- In order to be successful, the waste diversion program must have the full support of Brock U's management team.
- According to O.Reg. 102/94, the Waste Reduction Work Plan (Appendix D) or a summary of the plan must be posted at the facility in a place where it can be viewed. If a summary of the work plan is posted, the full Work Plan must be made available for review upon request by any of the university's staff or students.
- The waste audit report and waste reduction work plan must be retained on file for a minimum of five years.
- A waste audit report and waste reduction work plan must be conducted and updated annually.

### Attachment A1

#### **ONTARIO REGULATION 102/94**

#### WASTE AUDITS AND WASTE REDUCTION WORK PLANS

Consolidation Period: From March 3, 1994 to the e-Laws currency date.

No amendments.

This Regulation is made in English only.

#### PART I GENERAL

1. In this Regulation,

"waste" means municipal waste as defined in Regulation 347 of the Revised Regulations of Ontario, 1990;

"waste reduction work plan" means a plan to reduce, reuse and recycle waste. O. Reg. 102/94, s. 1.

- 2. A waste audit required under this Regulation shall address,
- (a) the amount, nature and composition of the waste;
- (b) the manner by which the waste gets produced, including management decisions and policies that relate to the production of waste; and
- (c) the way in which the waste is managed. O. Reg. 102/94, s. 2.
- **3.** (1) A waste reduction work plan required under this Regulation shall include, to the extent that is reasonable, plans to reduce, reuse and recycle waste and shall set out who will implement each part of the plan, when each part will be implemented and what the expected results are.
  - (2) In developing the work plan, regard shall be had to the following principles:
  - 1. Reduction is the first objective.
  - 2. If reduction is not possible, then reuse is the next objective.
  - 3. If reduction and reuse are not possible, then recycling is the final objective. O. Reg. 102/94, s. 3.
- **4.** A person who is required under this Regulation to prepare a report of a waste audit or a waste reduction work plan shall prepare it on a form provided by the Ministry or in the same format as such a form. O. Reg. 102/94, s. 4.
- **5.** (1) A person who is required under this Regulation to prepare a report of a waste audit or a waste reduction work plan shall retain a copy of the report or plan for at least five years after it was prepared.
- (2) A person who is required under this Regulation to prepare a report of a waste audit or a waste reduction work plan shall submit to the Director, on request, the required report or plan, within seven days of the Director requesting them. O. Reg. 102/94, s. 5.
- **6.** (1) A person who becomes subject to an obligation under this Regulation to prepare a report of a waste audit or a waste reduction work plan shall do so within six months of becoming subject to the obligation.
  - (2) This section does not apply with respect to updated reports or plans.
- (3) This section does not apply with respect to obligations of a builder under Part IV or a demolisher under Part V. O. Reg. 102/94, s. 6.
- 7. (1) A new owner or operator to whom this Regulation applies is not required to conduct a new waste audit or prepare a new waste reduction work plan if an audit or work plan was conducted or prepared by a previous owner or operator and the new owner or operator updates the audit and work plan as required under this Regulation.
  - (2) This section does not apply with respect to a builder under Part IV or a demolisher under Part V. O. Reg. 102/94, s. 7.
- **8.** (1) A person who has an obligation to conduct a waste audit and prepare a report under Part II, III, VI, VIII, VIII, IX, X or XI in respect of more than one retail shopping establishment, retail shopping complex, building, restaurant, hotel or motel, hospital, location or campus of an educational institution, or site of a manufacturing establishment, may conduct a single

<sup>&</sup>quot;waste audit" means a study relating to waste;

- **50.** The waste reduction work plan shall include measures for communicating the plan to the operator's employees who work at the hospital and, as a minimum, those measures shall require,
  - (a) that the plan or a summary be posted in places where most employees will see it; and
  - (b) if a summary is posted, that any employee who requests to look at the plan be allowed to do so. O. Reg. 102/94, s. 50.

## PART X EDUCATIONAL INSTITUTIONS

- **51.** (1) This Part applies to the operator of an educational institution in respect of a location or campus of the institution if, at the location or campus, at any time during the calendar year, more than 350 persons are enrolled.
- (2) This Part continues to apply in respect of a location or campus for the two calendar years following the last year in which more than 350 persons were enrolled at the location or campus. O. Reg. 102/94, s. 51.
- **52.** (1) The operator shall conduct a waste audit covering the waste generated by the operation of the institution at the location or campus. The audit shall also address the extent to which materials or products used consist of recycled or reused materials or products.
  - (2) After conducting the waste audit, the operator shall prepare a written report of the audit.
- (3) In every year following the initial waste audit, the operator shall update the audit and prepare an updated written report. O. Reg. 102/94, s. 52.
- **53.** (1) The operator shall prepare a written waste reduction work plan, based on the waste audit, to reduce, reuse and recycle waste generated by the operation of the institution at the location or campus.
- (2) In every year following the preparation of the initial waste reduction work plan, the operator shall prepare an updated written plan. O. Reg. 102/94, s. 53.
  - **54.** The operator shall implement the waste reduction work plan as updated. O. Reg. 102/94, s. 54.
- **55.** The waste reduction work plan shall include measures for communicating the plan to the operator's employees who work at the location or campus and, as a minimum, those measures shall require,
  - (a) that the plan or a summary be posted in places where most employees will see it; and
  - (b) if a summary is posted, that any employee who requests to look at the plan be allowed to do so. O. Reg. 102/94, s. 55.

#### PART XI LARGE MANUFACTURING ESTABLISHMENTS

- **56.** (1) This Part applies to the owner or operator of a site that is a manufacturing establishment.
- (2) This Part does not apply to an owner of a site in a particular calendar year if,
- (a) during the two preceding calendar years there was no calendar month in which the hours worked by the persons employed at the site exceeded 16,000 hours; and
- (b) the owner is able to demonstrate this fact, within seven days of a request from the Director, through evidence satisfactory to the Director.
- (3) Copies of the records related to hours of employment maintained under section 11 of the *Employment Standards Act* shall be deemed to be sufficient evidence of hours worked at a site if the copies are certified by the owner or the owner's representative as to the accuracy of the records.
  - (4) In this Part,

"owner" includes the operator of a manufacturing establishment but does not include a landlord;

- "site" means one property and includes nearby properties owned or leased by the same person where passage from one property to another involves crossing, but not travelling along, a public highway. O. Reg. 102/94, s. 56.
- **57.** (1) The owner shall conduct a waste audit covering the waste generated by the operation of the establishment at the site. The audit shall also address the extent to which materials or products used or sold consist of recycled or reused materials or products.
  - (2) After conducting the waste audit, the owner shall prepare a written report of the audit.
- (3) In every year following the initial waste audit, the owner shall update the audit and prepare an updated written report. O. Reg. 102/94, s. 57.
- **58.** (1) The owner shall prepare a written waste reduction work plan, based on the waste audit, to reduce, reuse and recycle waste generated by the operation of the establishment.
- (2) In every year following the preparation of the initial waste reduction work plan, the owner shall prepare an updated written plan. O. Reg. 102/94, s. 58.

Partial copy of O.Reg.103/94

#### **ONTARIO REGULATION 103/94**

# INDUSTRIAL, COMMERCIAL AND INSTITUTIONAL SOURCE SEPARATION PROGRAMS

**Consolidation Period:** From March 3, 1994 to the e-Laws currency date.

No amendments.

This Regulation is made in English only.

#### SOURCE SEPARATION PROGRAMS

- 1. In this Regulation,
- "Northern Ontario" means the territorial districts of Algoma, Cochrane, Kenora, Manitoulin, Nipissing, Parry Sound, Rainy River, Sudbury, Thunder Bay and Timiskaming and The Regional Municipality of Sudbury;
- "source separation program" means a program to facilitate the source separation of waste for reuse or recycling. O. Reg. 103/94, s. 1.
  - 2. (1) A source separation program required under this Regulation must include,
  - (a) the provision of facilities for the collection, handling and storage of source separated wastes described in subsection (2) adequate for the quantities of anticipated wastes;
  - (b) measures to ensure that the source separated wastes that are collected are removed;
  - (c) the provision of information to users and potential users of the program,
    - (i) describing the performance of the program,
    - (ii) encouraging effective source separation of waste and full use of the program;
  - (d) reasonable efforts to ensure that full use is made of the program and that the separated waste is reused or recycled.
- (2) The source separated waste referred to in clause (1) (a) is waste that has been source separated from other kinds of waste and that consists solely of waste from one or more of the following categories:
  - 1. The categories of waste set out in the part of the Schedule applicable to the person required to implement the source separation program.
  - 2. The categories of waste set out in Schedule 1, 2 or 3 of Ontario Regulation 101/94 that the source separation program accepts.
- (3) A source separation program required under this Regulation must provide for all the categories of waste set out in the part of the Schedule applicable to the person required to implement the program except for categories of waste that cannot be reasonably anticipated. O. Reg. 103/94, s. 2.

- **3.** Source separation programs required by this Regulation are exempt from sections 27, 40 and 41 of the Act. O. Reg. 103/94, s. 3.
- **4.** (1) A source separation program that is not required by this Regulation is exempt from sections 27, 40 and 41 of the Act if,
  - (a) the program is restricted to waste generated at a single site;
  - (b) the program only accepts waste that has been source separated from other kinds of waste and that consists solely of waste from one or more of the categories of waste set out in Schedule 1, 2 or 3 of Ontario Regulation 101/94;
  - (c) the program includes everything set out in subsection 2 (1).
- (2) For the purposes of clause (1) (c), the reference to source separated waste in clause 2 (1) (a) shall be deemed to be a reference to the waste described in clause (1) (b). O. Reg. 103/94, s. 4.

#### RETAIL SHOPPING ESTABLISHMENTS

- **5.** (1) This section applies to the owner of an establishment that sells goods or services at retail to persons who come to the establishment if,
  - (a) the establishment occupies premises with a floor area of at least 10,000 square metres; or
  - (b) the establishment occupies premises in a complex in respect of which section 6 applies and the owner of the establishment is solely responsible for the establishment's waste management.
- (2) The owner shall implement a source separation program for the wastes generated by the establishment or shall ensure that such a program is implemented.
- (3) This section applies only in respect of an establishment located within a local municipality that has a population of at least 5,000.
- (4) This section takes effect with respect to an establishment in Northern Ontario on July 1, 1996. O. Reg. 103/94, s. 5.

#### RETAIL SHOPPING COMPLEXES

- **6.** (1) This section applies to the owner of a complex that contains premises occupied by establishments that sell goods or services at retail to persons who come to the establishments if the total floor area of such premises is at least 10,000 square metres.
- (2) The owner shall implement a source separation program for the wastes generated at the complex or shall ensure that such a program is implemented.
- (3) The source separation program need not provide for the waste generated in the operation of an establishment in the complex if section 5 applies to the owner of the establishment.
- (4) This section applies only in respect of a complex located in a local municipality that has a population of at least 5,000.
- (5) This section takes effect with respect to a complex in Northern Ontario on July 1, 1996. O. Reg. 103/94, s. 6.

- (c) a building in respect of which section 9 applies;
- (d) a hotel or motel in respect of which section 12 applies;
- (e) a hospital in respect of which section 13 applies;
- (f) a location or campus of an educational institution in respect of which section 14 applies.
- (4) This section does not apply to an owner of a restaurant in a particular calendar year if,
- (a) during the two preceding calendar years there was no year in which the gross sales for all restaurants operated by the owner in Ontario equalled or exceeded \$3,000,000; and
- (b) the owner is able to demonstrate this fact, within seven days of a request from the Director, through evidence satisfactory to the Director.
- (5) Copies of the records related to purchase and sale maintained under subsection 5 (1) of Regulation 1013 of the Revised Regulations of Ontario, 1990 shall be deemed to be sufficient evidence of the gross sales of a restaurant if the copies are certified by the owner or the owner's representative as to the accuracy of the records.
- (6) This section applies only in respect of a restaurant located within a local municipality that has a population of at least 5,000.
- (7) This section takes effect with respect to a restaurant in Northern Ontario on July 1, 1996. O. Reg. 103/94, s. 11.

#### HOTELS AND MOTELS

- **12.** (1) The owner of a hotel or motel that has more than seventy-five units shall implement a source separation program for the wastes generated by the operation of the hotel or motel or shall ensure that such a program is implemented.
- (2) This section applies only in respect of a hotel or motel located within a local municipality that has a population of at least 5,000.
- (3) This section takes effect with respect to a hotel or motel in Northern Ontario on July 1, 1996. O. Reg. 103/94, s. 12.

#### **HOSPITALS**

- **13.** (1) The operator of a public hospital classified as a class A, B or F hospital in Regulation 964 of the Revised Regulations of Ontario, 1990 shall implement a source separation program for the wastes generated by the operation of the hospital or shall ensure that such a program is implemented.
- (2) This section applies only in respect of a public hospital located within a local municipality that has a population of at least 5,000.
- (3) This section takes effect with respect to a public hospital in Northern Ontario on July 1, 1996. O.Reg. 103/94, s. 13.

#### **EDUCATIONAL INSTITUTIONS**

**14.** (1) This section applies to the operator of an educational institution in respect of a location or campus of the institution if, at the location or campus, at any time during the

calendar year, more than 350 persons are enrolled.

- (2) The operator shall implement a source separation program for the waste generated by the operation of the institution at the location or campus or shall ensure that such a program is implemented.
- (3) This section continues to apply in respect of a location or campus for the two calendar years following the last year in which more than 350 persons were enrolled at the location or campus.
- (4) This section applies only in respect of a location or campus located within a local municipality that has a population of at least 5,000.
- (5) This section takes effect with respect to a location or campus in Northern Ontario on July 1, 1996. O. Reg. 103/94, s. 14.

#### LARGE MANUFACTURING ESTABLISHMENTS

- **15.** (1) This section applies to the owner or operator of a site that is a manufacturing establishment.
- (2) The owner shall implement a source separation program for the waste generated by the operation of the establishment at the site or shall ensure that such a program is implemented.
  - (3) This section does not apply to an owner of a site in a particular calendar year if,
  - (a) during the two preceding calendar years there was no calendar month in which the hours worked by the persons employed at the site exceeded 16,000 hours; and
  - (b) the owner is able to demonstrate this fact, within seven days of a request from the Director, through evidence satisfactory to the Director.
- (4) Copies of the records related to hours of employment maintained under section 11 of the *Employment Standards Act* shall be deemed to be sufficient evidence of hours worked at a site if the copies are certified by the owner or the owner's representative as to the accuracy of the records.
  - (5) In this section,
  - "owner" includes the operator of a manufacturing establishment but does not include a landlord;
  - "site" means one property and includes nearby properties owned or leased by the same person where passage from one property to another involves crossing, but not travelling along, a public highway. O. Reg. 103/94, s. 15.

#### **TRANSITION**

**16.** Except as otherwise provided, a person who, upon the coming into force of this Regulation, or at any time within twelve months after the coming into force of this Regulation, becomes subject to an obligation with respect to the implementation of a source separation program shall fulfil the obligation within twelve months after the coming into force of this Regulation. O.Reg. 103/94, s. 16.

### **SCHEDULE**

WASTES TO BE PROVIDED FOR IN SOURCE SEPARATION PROGRAMS

- 2. Cardboard (corrugated).
- 3. Fine paper.
- 4. Glass bottles and jars for food or beverages.
- 5. Newsprint.
- 6. Polyethylene terephthalate bottles for food or beverages (including bottles made primarily of polyethylene terephthalate).
- 7. Steel food or beverage cans (including cans made primarily of steel).

### PART IX HOSPITALS

(referred to in section 13)

- 1. Aluminum food or beverage cans (including cans made primarily of aluminum).
- 2. Cardboard (corrugated).
- 3. Fine paper.
- 4. Glass bottles and jars for food or beverages.
- 5. Newsprint.
- 6. Steel food or beverage cans (including cans made primarily of steel).

# PART X EDUCATIONAL INSTITUTIONS

### (referred to in section 14)

- 1. Aluminum food or beverage cans (including cans made primarily of aluminum).
- 2. Cardboard (corrugated).
- 3. Fine paper.
- 4. Glass bottles and jars for food or beverages.
- 5. Newsprint.
- 6. Steel food or beverage cans (including cans made primarily of steel).

### PART XI LARGE MANUFACTURING ESTABLISHMENTS

(referred to in section 15)

- 1. Aluminum.
- 2. Cardboard (corrugated).
- 3. Fine paper.
- 4. Glass.
- 5. Newsprint.

Hi Jennifer,

We are looking for some information for our waste/recycling audit. Please see the attached email for details.

Are you able to provide the report? I have also attached the summary from 2022.

### thanks

John M. Dick, NPD

Manager, Grounds Services

**Brock University** | Facilities Management

Hi Frank,

Volume, grade, and revenue would be good for the calendar year 2023.

thanks

John Dick

Subject: RE: 2023 Brock Annual Waste Audit Report

Hi Jay,

Last year we recycled approximately 1800 wine, liquor, beer bottles and cans and around 1500 lbs of fryer grease.

Hope this helps.

**Thanks** 

Dave

To: Dave O'Connor < DOConnor@brockbusu.ca > Subject: 2023 Brock Annual Waste Audit Report

Hello Dave,

I hope all is well.

Another year is behind us and I am, again, collecting data for our Brock U. Annual Waste Audit Report.

If you could please provide information on:

- numbers of all beer, wine and liquor bottle returns for 2023
- the amount of oil & grease removed/recycled from your kitchen in 2023.

Thanks.

Jay

Subject: RE: Oil amount for the January - December 22

Hell Tanya,

I hope all is well.

Currently I am collecting annual data for our 2023 Brock U. Waste Audit and if you could please get information on the oil/grease captured and removed from campus in 2023 that would be appreciated.

Thanks.

Jay

**Subject:** paper product purchases

From: Christine Alic <calic@brocku.ca>

Date: 01/02/2024 9:09 AM

To: Jay Ismailovic < jismailovic@brocku.ca>

Hi Jay,

Kyle got the numbers for me. See below:

Advance Bath Tissue 2-Ply Ecologo - 150 Cascades T225 Paper Towel Rolls - 800 Everest Roll towels - 196 Snow soft jumbo bath tissue - 1072 Univ Jumbo bath Jr 2-ply eco logo - 930 Villa single fold towels - 106

Total cases of all paper product = 3254

Each of the cases weighs around 14 to 16 pounds so total weight is probably somewhere near 45, 000 to 50, 000 pounds.

I hope this is helpful.

Chris

## **Ministry of the Environment Waste Form**

## Report of a Waste Audit

## **Industrial, Commercial and Institutional Establishments**

As required by O. Reg. 102/94

- This report must be prepared 6 months after becoming subject to O. Reg. 102/94 and a copy retained on file for at least five years after it is prepared, and be made available to the ministry upon request.
- For large construction and demolition projects, please refer to the forms included with "A Guide to Waste Audits and Waste Reduction Work Plans for Construction and Demolition Projects as Required Under Ontario Regulation 102/94" (revised July 2008)

#### I. GENERAL INFORMATION

Name of Owner and/or Operator of Entity(ies) and Company Name:									
Brock University									
Name of Contact Person:	Telephone #:	Email address:							
Jay Ismailovic	905-688-5550 x4803	jismailovic @brocku.ca							
Street Address(es) of Entity(ies):									
1812 Sir Isaac Brock Way									
Municipality:									
St. Catharines, Ontario, L2S 3A1									
	Type of Entity								
	(check one)								
Retail Shopping Establishments	Hotels and Motels								
Retail Shopping Complexes	Hospitals								
Office Buildings	Educational Institutions		X						
Restaurants	Large Manufacturing Es	tablishments							

Note: O. Reg. 102/94 does not apply to multi-unit residential buildings.

#### II. DESCRIPTION OF ENTITY

#### Provide a brief overview of the entity(ties):

Brock University is an educational institution with approximately 18,639 students (full and part-time undergraduate and graduate in 2022/23) which satisfies Part X of Ontario Regulation 102/94 & 103/94. O.Reg. 102/94 requires operators of educational institutions with more than 350 full- or part-time students enrolled during the calendar year to conduct an annual waste audit and implement a waste reduction work plan. O.Reg. 103/94 requires that source separation programs be implemented and maintained for fine papers, newsprint, aluminum cans, steel cans, glass beverage containers and corrugated cardboard. Brock U undertook this audit in order to assist them in reducing wastes generated on campus and/or disposed to landfill, while being in compliance with the required Regulations.

## III. HOW WASTE IS PRODUCED AND DECISIONS AFFECTING THE PRODUCTION OF WASTE

For each category of waste that is produced at the entity(ies), explain how the waste will be produced and how management decisions and policies will affect the production of waste.

management decisions and policies will affect	•							
Categories of Waste	How Is the Waste Produced and What Management							
	Decisions/Policies Affect Its Production?							
PET (#1) plastic food and beverage bottles	Brought onto campus or generated on campus by staff/students.							
Glass food and beverage bottles/jars	Brought onto campus or generated on campus by staff/students.							
Aluminum food and beverage cans	Brought onto campus or generated on campus by staff/students.							
Steel food and beverage cans	Brought onto campus or generated on campus by staff/students.							
Gable Top Containers	Brought onto campus or generated on campus by staff/students.							
Aseptic Containers	Brought onto campus or generated on campus by staff/students.							
Polypropylene (#5 Plastics)	Brought onto campus or generated on campus by staff/students.							
Boxboard shoe boxes, cereal boxes, etc.	Brought onto campus or generated on campus by staff/students.							
Newsprint	Brought onto campus or generated on campus by staff/students.							
Glossy magazines, catalogues, flyers	Brought onto campus or generated on campus by staff/students.							
Fine paper	Brought onto campus or generated on campus by staff/students.							
Cardboard	Brought onto campus shipping/generated on campus by staff/students.							
Paper towels	Generated by staff/students on campus							
Organics / Food Waste	Brought onto campus/generated on campus by staff/students.							
Coffee cups	Brought onto campus/generated on campus by staff/students.							
HDPE (#2) plastic jugs, crates, totes and	Brought onto campus/generated on campus by staff/students.							
drums								
PVC (#3) plastics	Brought onto campus/generated on campus by staff/students.							
LDPE (#4) plastic film	Brought onto campus/generated on campus by staff/students.							
Polystyrene (#6)	Brought onto campus/generated on campus by staff/students.							
Other Plastics (#7)	Brought onto campus/generated on campus by staff/students.							
Scrap Metals	Generated by staff/students on campus							
Scrap Woods	Generated by staff/students on campus							
eWastes	Generated by staff/students on campus							
Bulbs & Ballasts	Generated by staff/students on campus							
Batteries	Generated by staff/students on campus							
Oil & Grease	Generated by staff/students on campus							
Yard Wastes	Generated by staff/students on campus							
Used Furniture	Generated by staff/students on campus							
Other / Non-Recyclable	Generated by staff/students on campus							

**Note:** When completing this form, write "n/a" in the columns where the entity will not produce any waste for a category of waste.

## IV. MANAGEMENT OF WASTE

For each category of waste listed below, indicate which waste items will be disposed or reused/recycled and how each item will be managed at the entity(ies).

each item will be managed at the entity(ies).  Category Waste to be Disposed Reused or Recycled Waste											
Category	Waste to be Disposed	· · · · · · · · · · · · · · · · · · ·									
PET (#1) plastic food and beverage bottles	Staff/Students may place in garbage	Staff/Students may place in recycling containers.									
Glass food and beverage bottles/jars	Staff/Students may place in garbage	Staff/Students may place in recycling containers.									
Aluminum food and beverage cans	Staff/Students may place in garbage	Staff/Students may place in recycling containers.									
Steel food and beverage cans	Staff/Students may place in garbage	Staff/Students may place in recycling containers.									
Gable Top Containers	Staff/Students may place in garbage	Staff/Students may place in recycling containers.									
Aseptic Containers	Staff/Students may place in garbage	Staff/Students may place in recycling containers.									
Polypropylene (#5 Plastics)	Staff/Students may place in garbage	Staff/Students may place in recycling containers.									
Boxboard shoe boxes, cereal boxes, etc.	Staff/Students may place in garbage	Staff/Students may place in recycling containers.									
Newsprint	Staff/Students may place in garbage	Staff/Students may place in recycling containers.									
Glossy magazines, catalogues, flyers	Staff/Students may place in garbage	Staff/Students may place in recycling containers.									
Fine paper	Staff/Students may place in garbage	Staff/Students may place in recycling containers.									
Cardboard	Staff/Students may place in garbage	Staff/Students may place in recycling containers.									
Paper towels	Staff/Students place in garbage	No recycling program implemented.									
Organics / Food Waste	Staff/Students may place in garbage	Staff/Students may place in organics containers.									
Coffee cups	Staff/Employees may place in garbage	Staff/Students may place in recycling containers.									
HDPE (#2) plastic jugs, crates, totes and drums	Staff/students may place in garbage	Staff/Students may place in recycling containers.									
PVC (#3) plastics	Staff/students place in garbage	No recycling program implemented.									
LDPE (#4) plastic film	Staff/students may place in garbage	Staff/Students may place in recycling containers.									
Polystyrene (#6)	Staff/students may place in garbage	Staff/Students may place in recycling containers.									
Other Plastics (#7)	Staff/students may place in garbage	Staff/Students may place in recycling containers.									
Scrap Metals	Staff/students may place in garbage	Staff/Students may place in recycling containers.									
Scrap Woods	Staff/students may place in garbage	Staff may reuse materials (pallets).									
eWastes	Staff/Students may place in garbage	Staff/Students may place in recycling containers.									
Bulbs & Ballasts	Staff/Students may place in garbage	Staff may place in recycling containers.									
Batteries	Staff/Students may place in garbage	Staff/Students may place in recycling containers.									
Oil & Grease	Staff may place in garbage	Staff may place in recycling containers.									
Yard Wastes	Staff may place in garbage	Staff may place in recycling containers.									
Used Furniture	Staff may place in garbage	Staff may place in recycling containers.									
Other / Non-Recyclable  Note: When completing this form, write "n/a" in	Staff/students place in garbage	Not applicable.									

Note: When completing this form, write "n/a" in the columns where the entity will not produce any waste for a category of waste.

#### V. ESTIMATED QUANTITY OF WASTE PRODUCED

Categories of Waste	Estimated Amount of Waste													
		Generated			luced/Reuse			Recycled			Disposed

Percent Change (C ÷A x 100)			-36.7%	==-		7.3%			-36.0%			-39.1%		
Note: When completing this form write "n/a" in								L				0770		

Note: When completing this form, write "n/a" in the "Estimated Amount of Waste Produced" column where the entity will not produce any waste for a category of waste \* Fill out these columns each year following the initial waste audit or baseline year to determine the progress that is being made by your waste reduction program Base year taken as 2012

# VI. EXTENT TO WHICH MATERIALS OR PRODUCTS USED OR SOLD BY THE ENTITY CONSIST OF RECYCLED OR REUSED MATERIALS OR PRODUCTS

Please answer the following questions:

1. Do you have a management policy in place that promotes the purchasing and/or use of materials or products that consist of recycled and/or reused materials or products? If yes, please describe.

No formal "green" purchasing policy is in place at Brock U. However, the different purchasing departments at Brock U do consider environmental impacts of their purchases when ever options are available and feasible. Approximately 22,725 kg of paper products with recycled content were purchased in 2023.

2. Do you have plans to increase the extent to which materials or products used or sold\* consist of recycled or reused materials or products? If yes, please describe.

Not applicable.

\* Information regarding materials or products "sold" that consist of recycled or reused materials or products is only required from owner(s) of retail shopping establishments and the owner(s) or operator(s) of large manufacturing establishments.

Please attach any additional page(s) as required to answer the above questions.

I hereby certify that the information pr	ovided in this Report of Waste	Audit is complete and correct.
Signature of authorized official:	Title:	Date:

## **Ministry of the Environment Waste Form**

## **Report of a Waste Reduction Work Plan**

## **Industrial, Commercial and Institutional Establishments**

As required by O. Reg. 102/94

This report must be prepared 6 months after becoming subject to O. Reg. 102/94 and a copy retained on file for at least five years after it is prepared, and be made available to the ministry upon request.

#### I. GENERAL INFORMATION

Name of Owner and/or Operator of Entity(io	es) and Company Name:		
Brock University			
Name of Contact Person:	Telephone #:	Email address:	
Jay Ismailovic	905-688-5550 x4803	jismailovic @brocku.ca	
Street Address(es) of Entity(ies):			
1812 Sir Isaac Brock Way			
Municipality:			
St. Catharines, Ontario, L2S 3A1			
	<b>Type of Entity</b>		
	(check one)		
Retail Shopping Establishments	Hotels and Motels		
Retail Shopping Complexes	Hospitals		
Office Buildings	Educational Institutions		X
Restaurants	Large Manufacturing Est	tablishments	

Note: O. Reg. 102/94 does not apply to multi-unit residential buildings.

#### II. DESCRIPTION OF THE ENTITY

#### Provide a brief overview of the entity(ties):

Brock University is an educational institution with approximately 18,639 students (full and part-time undergraduate and graduate in 2022/23) which satisfies Part X of Ontario Regulation 102/94 & 103/94. O.Reg. 102/94 requires operators of educational institutions with more than 350 full- or part-time students enrolled during the calendar year to conduct an annual waste audit and implement a waste reduction work plan. O.Reg. 103/94 requires that source separation programs be implemented and maintained for fine papers, newsprint, aluminum cans, steel cans, glass beverage containers and corrugated cardboard. Brock U undertook this audit in order to assist them in reducing wastes generated on campus and/or disposed to landfill, while being in compliance with the required Regulations.

## III. PLANS TO REDUCE, REUSE AND RECYCLE WASTE

For each category of waste described in Part V of "Report of a Waste Audit" (on which this plan is based), explain what your plans are to Reduce, Reuse and Recycle the waste, including: 1) how the waste will be source separated at the establishment, and 2) the programs to reduce, reuse and recycle all source separated waste.

recycle all source s	eparated waste.
Waste Category (as stated in Part V of your "Report of a Waste Audit")	Source Separation and 3Rs Program
Cardboard	"Cardboard 3Rs Program"  Reduce: Suppliers will be encouraged to make use of reusable containers for the shipment of supplies to Brock University.  Reuse: Cardboard boxes will be reused for shipments when appropriate.  Recycle: Staff/Students will be reminded of the existing program. Cleaners will be trained on where to dispose of waste correctly.
Mixed Containers/ Plastics (PET, HDPE, LDPE, PP, PS, Aluminum, Steel, Glass, Aseptic)	"Mixed Container/Plastics 3Rs Program"  Reduce: Staff/Students will be encouraged to bring reusable containers food/beverage containers for lunch and breaks. Brock University will encourage suppliers to reduce the amount of polystyrene used to transport supplies. Brock University will encourage suppliers to reduce the amount of plastic film and wrapping materials used to transport supplies. Brock U added eleven new water bottle refilling stations on campus, bringing the total to 20 water bottle refilling stations. These stations helped the university reduce the amount of plastic water bottles used on campus.  Reuse: Staff/Students will be encouraged to reuse plastic crates and totes wherever possible. Recycle: Staff/Students will be provided with recycling bins in high waste generating areas and food service areas for mixed containers/plastics. Staff/Students will be encouraged to place mixed containers/plastics in appropriate recycling bins with appropriate signage affixed to the receptacle. Receptacles will be emptied on a regular basis before they become full into large roll away bins for collection by Niagara Recycling on a weekly basis.
Mixed Papers (Fine Paper, newsprint, boxboard, magazines, molded papers, kraft, catalogues, flyers, etc)	"Mixed Paper 3Rs Program"  Reduce: Staff/Students will be encouraged to print on both sides of each piece of paper as well as not print when it is unnecessary. Staff/Students will be encouraged to take reading materials home with them after they are finished with them. Staff and students will be sent, via email, news sources that are available online opposed to purchasing paper copies of news.  Reuse: Discarded paper with print only on one side will be used for note pads/scrap paper. Staff/Students will be encouraged to leave newspapers they are finished reading in common areas for others to read. Textbooks collected for donations.  Recycle: Staff/Students will be provided with instructions via email. Receptacles will be provided in each office, classroom and high waste generating areas. Staff/Students will be encouraged to place newsprint, fine paper, boxboard, magazines, molded papers, etc in appropriate recycling receptacles. Staff/Students will empty receptacles into centralized containers. Custodial Staff/Students will empty centralized containers into bulk container in designated area for collection by Niagara Recycling on a weekly basis.
Confidential Papers	"Confidential Paper 3Rs Program"  Reduce: None.  Reuse: None.  Recycle: Staff/Students will be reminded of the existing program. Receptacles will be provided in each designated office area as required. Staff/Students will be encouraged to place all confidential paper in the designated consoles. Contactor will empty consoles appropriately for shredding and recycling as required.
Paper Towels	"Hand Dryer 3Rs Program"  Reduce: Replace paper towels in washrooms with hand dryers. Reusable towels will be encouraged for the classrooms and offices when it does not pose a health risk.  Reuse: None.  Recycle: Staff/students will be encouraged to place paper towels in the organics collection bins.
Scrap Metals	"Scrap Metals 3Rs Program" Reduce: Brock University will investigate through metal optimization study to insure steel is

	used with as little scrap generated as possible.
	Reuse: None.
	Recycle: Staff will be reminded of the existing program. Scrap conveyor system will be maintained and Service Provider will collect scrap metals for recycling.
	"Organics 3Rs Program"
	<u>Reduce:</u> Students will be encouraged to bring uneaten food items home after lunch breaks or uneaten. Non-perishable food items can be donated to a local food drive.
	<u>Reuse:</u> Staff/Students provided with reusable china in some food service areas.
0	Recycle: Staff/Students will be continually reminded of the existing program. Kitchen staff &
Organics	cleaners trained on where to dispose of waste correctly. Additional bins added to the university food service areas to capture organic materials. Signs improved relating to organics program
	to assist staff/students in sorting organic stream correctly. Selling of disposable food containers
	discouraged on campus, and if sold, containers should be compostable. Updated organics
	handouts for staff/student education/training program. Training of food service staff regarding
	improvements to organics program. Pulping unit installed at main cafeteria.
	"Coffee Cups 3Rs Program"  Reduce: Staff/Students will be encouraged to use reusable coffee mugs and water bottles.
	Reuse: None.
Coffee Cups	Recycle: Staff/Students will be reminded of the existing program. Staff/students will be
	encouraged to place Coffee/Drink Cups in a separate bin if Brock University can find a
	feasible program to recycle/compost the coffee and drink cups.
	"Oil & Grease 3Rs Program"
Oil & Grease	Reduce: None. Reuse: None.
	Recycle: Staff/Students will be reminded of the existing program.
3 B's (Bulbs,	"3 B's 3Rs Program"
Ballasts,	Reduce: None.
Batteries)	Reuse: None.
Butterres)	Recycle: Staff/Students will be reminded of the existing program.  "eWaste 3Rs Program"
	Reduce: None.
Electronic	Reuse: Staff/students will be encouraged to reuse/donate electronic wastes if possible.
Wastes	Recycle: Staff/Students will be reminded of the existing program. Program to be expanded
	campus wide. IT Department to continue collecting for proper recycling of waste materials. Collection program during residence move-out week to be continued.
	"Yard Wastes 3Rs Program"
	Reduce: None.
Yard Wastes	Reuse: None.
Tara Wastes	Recycle: Staff will be reminded of the existing program. Grass clippings to be left after
	mowing. Trimmings to be mulched and/or recycled//composted off-site via contractor. Saw dust from wood shop dust collector to be used in mulch.
	"Wood Pallets 3Rs Program"
Wood	Reduce: Staff to monitor use of Pallet to eliminate/reduce broken pallets.
Pallets/Scrap	Reuse: Staff will be reminded of the existing program. Staff/Students will be encouraged to
Woods	use scrap wood before new wood is purchased for use at the University.
77 00 <b>u</b> s	<u>Recycle:</u> Staff will be reminded of sawdust recycling program relating to wood shop dust collector. Broken Pallets to be recovered and reused when possible.
	"Printer Toners 3Rs Program"
	Reduce: None.
Printer Toners	Reuse: Staff/Students will be reminded of the existing program. IT Department to continue
Timeer Toners	collecting for proper handling of waste materials. Students will be encouraged to return printer
	cartridges to suppliers/retailers who offer return programs (such as Staples).  Recycle: None.
	"Glove & Rag 3Rs Program"
	Reduce: Staff/Students will be encouraged to use gloves for multiple tasks before placing in
Clothing/Textiles	the reuse receptacles.
Siouming, Tokulos	Reuse: Staff/Students will be encouraged to re-use gloves and cleaning cloths for multiple
	tasks before disposing. <u>Recycle:</u> None.
Used Furniture	"Used Furniture 3Rs Program"
	1

Reduce: None.
$\overline{Reuse:}$ Staff/Students will be reminded of the existing program. Staff/Students will be
encouraged to reuse used furniture before new furniture is purchased for use at the
University
Recycle: None.

#### IV. RESPONSIBILITY FOR IMPLEMENTING THE WASTE REDUCTION WORK PLAN

Identify who is responsible for implementing the Waste Reduction Work Plan at your entity(ies). If more than one person is responsible for implementation, identify each person who is responsible and indicate the part of the Waste Reduction Work Plan that each person is responsible for implementing.

Name of Person	Responsibility	Telephone #
Jay Ismailovic	All recycling programs*	905-688-5550 x4803
	(or will direct question/comment to	
	appropriate person)	

.../2

## V. TIMETABLE FOR IMPLEMENTING WASTE REDUCTION WORK PLAN

Provide a timetable indicating when each Source Separation and 3Rs program of the Waste Reduction Work Plan will be implemented.

Source Separation and 3Rs Program Schedule for Completion				
Cardboard	3Rs Program currently in place. Continual improvement to signage and additional promotional campaigns to be considered. Review operational improvements (Replace baler with compactor)			
Mixed Containers/Plastics	3Rs Program currently in place. Continual improvement to signage and additional promotional campaigns to be considered. Single stream program implemented at Village Residences.			
Mixed Papers	3Rs Program currently in place. Continual improvement to signage and additional promotional campaigns to be considered. Single stream program implemented at Village Residences.			
Confidential Papers	3Rs Program currently in place. Continual improvement to signage and additional promotional campaigns to be considered.			
Scrap Metals	3Rs Program currently in place. Continual improvement to signage and additional promotional campaigns to be considered.			
Organics	3Rs Program currently in place. Continual improvement to signage and additional promotional campaigns to be considered. Additional organics bins to be purchased and installed in high traffic areas, as well as kitchenettes in office areas. Instructions to staff and students regarding expanded 3Rs program to occur in advance of program implementation.			
Coffee Cups	3Rs Program currently in place. Additional recycle bins dedicated to coffee cups to be purchased and placed in high traffic areas, office areas, and outdoor bins. Continual improvement of existing program regarding signage and additional promotional campaigns to be considered to increase capture rate of material. Instructions to staff and students regarding expanded 3Rs program to occur in advance of program implementation.			
Oil & Grease	3Rs Program currently in place. Continual improvement to signage and additional promotional campaigns to be considered.			
3 B's (Bulbs, Ballasts, Batteries)	3Rs Program currently in place. Continual improvement to signage and additional promotional campaigns to be considered.			
eWaste	3Rs Program currently in place. Continual improvement to signage and additional promotional campaigns to be considered.			
Yard Wastes	3Rs Program currently in place. Continual improvement to signage and additional promotional campaigns to be considered.			

Scrap Wood/ Wood Pallets	3Rs Program currently in place. Continual improvement to signage and additional promotional campaigns to be considered.
Printer Toners	3Rs Program currently in place. Continual improvement to signage and additional promotional campaigns to be considered.
Used Furniture	3Rs Program currently in place. Continual improvement to signage and additional promotional campaigns to be considered.
Hand Dryer Program	Hand Dryer Program is being considered, which would primarily focus on replacing paper towels in washrooms with hand dryers.
Glove and Rag Reuse Program	Glove and Rag Reuse Program is being considered.
Lab Glass Recycling Program	Investigate the feasibility of implementing a recycle program for lab glass in all lab areas on campus. If feasible, appropriate recycle bins to be purchased and installed in lab areas. Instructions to staff and students regarding new 3Rs program to occur in advance of program implementation.
Garbage Density Study	Continue to investigate the actual density of garbage disposed to landfill. Confirm the density of garbage disposed in front-end bins, as well as confirm weights of Central Shipping 8 yd3 compactor.
Mixed Container & Mixed Paper Tote Study	Conduct a study to verify average mixed container and mixed paper tote weights as well to conduct an inventory of bins on-campus. It is recommended that the total number of totes picked-up per week be verified.
Organic Tote Study	Conduct a study to verify organic tote weights as well to conduct an inventory of all organic totes on-campus. It is recommended that the total number of totes picked-up per week be verified.
Cardboard Bale Study	Conduct a study to verify effectiveness of cardboard system. Investigate feasibility of existing baling system, compared to switching to compactor system.

## VI. COMMUNICATION TO STAFF, CUSTOMERS, GUESTS AND VISITORS

Explain how the Waste Reduction Work Plan will be communicated to employees, customers, tenants, guests/visitors and students:

Explain how the Waste Reduction Work Plan will be communicated to employees, customers, tenants, guests/visitors and students. Sustainability committee will review and develop a workplan to be posted on University's computer bulletin board for staff and students. Additional promotional campaigns will also be considered to target specific audiences for specific programs. Continue to improve educational materials (hadouts, flyers) and signage across campus as required.

# VII. ESTIMATED WASTE PRODUCED BY MATERIAL TYPE AND THE PROJECTED AMOUNT

Material Categories (as stated in Part III)	Estimated Annual Waste Produced * (tonnes)	Name of Proposed 3Rs Program (as stated in Part III)	Projections to Reduce, Reuse or Recycle Waste (tonnes)		Estimated Annual Amount to be Diverted ** (%)	
			Reduce	Reuse	Recycle	
PET (#1) plastic food and beverage bottles	50.91	Mixed Container 3Rs Program		13.06	25.12	75%
HDPE Containers	13.08	Mixed Container 3Rs Program		0.00	8.50	65%
Polypropylene (#5 Plastic)	73.31	Mixed Container 3Rs Program		0.00	47.65	65%
Polystyrene (#6 Plastic)	11.05	Mixed Container 3Rs Program		0.00	7.18	65%
Aluminum food and beverage cans	12.15	Mixed Container 3Rs Program		0.00	9.12	75%
Steel food and beverage cans	15.72	Mixed Container 3Rs Program		0.00	10.22	65%
Glass food and beverage bottles/jars	18.93	Mixed Container 3Rs Program		11.34	5.70	90%
Gable Top/Milk Containers	17.40	Mixed Container 3Rs Program		0.00	15.31	88%
Aseptic / Tetra Paks	11.80	Mixed Container 3Rs Program		0.00	7.67	65%
Fine paper	105.80	Mixed Papers & Confidential Paper 3Rs Programs		0.00	93.10	88%
Newsprint	0.55	Mixed Paper 3Rs Program		0.00	0.48	88%
Boxboard shoe boxes, cereal boxes, etc.	200.43	Mixed Paper 3Rs Program		0.00	156.34	78%
Glossy magazines, flyers, textbooks	73.12	Mixed Paper 3Rs Program		0.00	58.50	80%
Corrugated Cardboard	71.83	Cardboard 3Rs Program		0.00	61.06	85%
Paper Towels	66.64	No 3Rs Program		0.00	0.00	NA
Coffee Cups	26.21	Coffee Cup 3Rs Program		0.00	6.55	25%
Organics	325.33	Organics 3Rs Program		0.00	195.20	60%
#2 Plastic (HDPE) - totes, bins, etc	0.00	Mixed Container 3Rs Program		0.00	0.00	65%
#3 Plastic (PVC)	0.00	Mixed Container 3Rs Program		0.00	0.00	65%
#4 Plastic Films (LDPE)	31.54	No 3Rs Program		0.00	0.00	NA
#6 Plastic Styrofoam	1.19	No 3Rs Program		0.00	0.00	NA
#7 Other Plastics	0.25	Mixed Container 3Rs Program		0.00	0.13	50%
Lab Glass/Plastics	0.22	No 3Rs Program		0.00	0.00	NA
Scrap Metal	45.42	Scrap Metals 3Rs Program		0.00	39.06	86%
Scrap Wood/Pallets	2.41	Wood Pallets 3Rs Program		1.48	0.00	70%
Electronic Wastes	17.37	eWaste 3Rs Program		0.00	16.50	95%
Fluorescent Bulbs	0.20	Bulbs 3Rs Program		0.00	0.20	100%

Batteries	1.91	Batteries 3Rs Program	0.00	1.78	93%
Printer Toners	0.03	Printer Toners 3Rs Program	0.03	0.00	100%
Oil & Grease	3.77	Oil & Grease 3Rs Program	0.00	3.77	100%
Yard Wastes	40.88	Yard Wastes 3Rs Program	0.00	40.88	100%
Used Furniture	5.51	Used Furniture 3Rs Program	5.51	0.00	100%
Construction	43.01	Construction 3Rs Program	0.00	43.01	100%
Other/Non-recyclable	95.89	No 3Rs Program	0.00	0.00	NA

<sup>\*</sup> Estimated Waste Produced = Waste Diverted (3Rs) + Waste Disposed

I hereby certify that the information provided in this Waste Reduction Work Plan is complete and correct.				
Signature of authorized official: Title: Date:				

.../4

<sup>\*\*</sup> Estimated Waste Diversion Rate = Amount of Waste Diverted (3Rs) ÷ Estimated Waste Produced x 100%
