

# Applicant Interest Form

**First name:**

**Last name:**

**Faculty members:** A list of faculty members who are currently accepting graduate students can be found here. Below please indicate in order of preference which faculty member(s) you wish to work with. (You may list up to four faculty members)

1.

2.

3.

4.

**Research topics:** Which topic(s) are you interested in researching? (check rank/check all that apply)

- |                                 |                             |                        |
|---------------------------------|-----------------------------|------------------------|
| Adolescence                     | Face recognition            | Personality assessment |
| Aggressive behavior             | fMRI                        | Physiology             |
| Aging                           | Future oriented cognition   | Positive psychology    |
| Asexuality                      | Gender                      | Prejudice              |
| Attention                       | Happiness                   | Psycholinguistics      |
| Brain development               | Inclusion                   | Psychopathy            |
| Childhood                       | Individual differences      | Reproduction           |
| Cognition                       | Intergroup relations        | Resilience             |
| Clinical/community psychology   | Language                    | Risk assessment        |
| Close relationships             | Lexical processing          | Risk-taking            |
| Cognitive development           | Lifespan development        | Self-evaluation        |
| Cognitive neuroscience          | Mental health               | Sentence processing    |
| Conscious perception            | Memory                      | Sex hormones           |
| Deception                       | Mild head injury/concussion | Sexual orientation     |
| Decision-making                 | Moral development           | Sleep                  |
| Dehumanization                  | Multitasking                | Sleep deprivation      |
| Development                     | Neuropsychology             | Social comparison      |
| Discrimination                  | Neuroendocrinology          | Social development     |
| Diversity                       | Neurolinguistics            | Stress                 |
| Electrophysiology (EEG/ERPs)    | Peer relationships          | Time                   |
| Emerging adulthood              | Performance                 | Traumatic brain injury |
| Emotion                         | Performance monitoring      | Victim selection       |
| Emotion perception              | Person perception           | Visual working memory  |
| Experience sampling methodology | Personality                 | Well-being             |
|                                 |                             | Other                  |
