

Research Volunteers Needed! Optimal Sites To Measure Skin Temperature

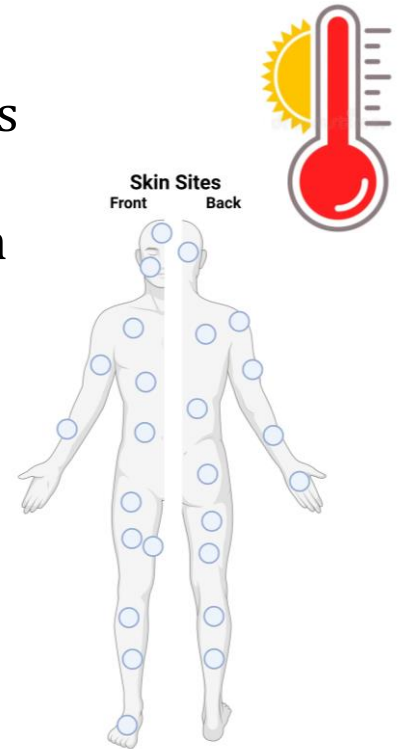

What's Involved?

- Two hours standing as the air becomes warm, cool, and back to neutral
- Temperature sensors taped to the skin
- Height, weight, and body fat (skinfold technique) measured
- \$20 compensation - ~3 hours total

Eligibility Open to All Adults

Participants must be able to:

1. stand for about two hours
2. Tolerate fluctuations 18 °C to 30°C
