Possible Courses Worksheet

Write down any unspecified program requirements you wish to fulfil during this academic session. Use this worksheet to keep track of possible courses you may wish to take. Consider the following checklist when compiling your list of possible course selections:

- ❒ Will this course fulfil the program requirement necessary? (*This question is usually indicated by the course code; check out the on-line resource section for more info.*)
- ❒ Do you meet the preliminary requirements of this course?
- ❒ Is this course offered at a time that is available to you, and that works with your schedule?

Once you have a list of possible courses to fulfil your program requirements, you can further decide between courses based on personal preferences and on what information is provided in each course description. The worksheet below is provided to help you keep track of your course selections and possible alternatives.

Program requirements to fulfil	Possible course options	Notes
