

trans-LINK PROJECT

ONTARIO RESOURCE DIRECTORY

August 2019

PREFACE

Trans communities are significantly impacted by physical and sexual violence. In Ontario, approximately 20% of trans persons report lifetime experiences of sexual and/or physical violence as a direct result of their gender identity (Bauer & Scheim, 2015). Despite this, many trans persons delay or avoid seeking the care they need due to past and/or anticipated experiences of stigmatization, discrimination, and mistreatment in healthcare settings (Bauer, Scheim, Deutsch, & Massarella, 2014). Furthermore, while most trans services and supports are located in metropolitan Toronto, a reported 68% of trans Ontarians reside outside this region (Bauer, Michelle, Todd, Matthias, Scanlon, & Travers, 2010).

There is a clear and pressing need for province-wide, intersectoral action to address the issue of sexual violence against trans persons. Dr. Janice Du Mont of Women's College Research Institute, Women's College Hospital has been collaborating with Egale Canada Human Rights Trust and the Ontario Network of Sexual Assault/Domestic Violence Treatment Centres (SA/DVTCs) on the trans-LINK Project – a multiphase initiative devoted to the development of a provincial intersectoral network on trans-affirming practice to better support sexual assault survivors.

Between June 7 and July 11, 2019, 106 representatives from Ontario's SA/DVTCs and trans-positive community organizations attended one of seven regional Knowledge Mobilization and Community Engagement (KM-CE) meetings held in Toronto, Mississauga, North York, London, Ottawa, Sudbury, and Thunder Bay. A primary objective of these sessions was to connect service providers across sectors and regions in the hopes of establishing longer-term referral relationships, increasing collaboration, and enhancing the continuum of care for trans survivors across the province.

This directory includes important information listed for every SA/DVTC and community organization represented across the trans-LINK project regional KM-CE meetings, as well as those organizations who weren't able to send a representative but expressed interest in being a part of the project. Listings include a summary of services as well as up-to-date contact information to aid in consolidating partnerships and making safer and more seamless referrals across sectors.

Our hope is that this resource is of use to those providing services and other supports to trans survivors of sexual assault across Ontario. We encourage you to use this directory to broaden professional networks within and across regions of the province.
