Popular Uses

OneDrive is a cloud file storage service that allows users to sync files (docs, photos, etc.) from a web browser or mobile device.

Easily backup, store and share photos, videos, documents and more - anywhere, on any device. Collaborate with Word, Excel, PowerPoint and OneNote.

SharePoint is an online content management and collaboration suite with site frontage and options for secure file sharing, versioning and governance.

A space in the cloud to store, share, and collaborate on content within a Department, Team or Project site.

Delve manages your Office 365 profile by allowing you to discover and organize the information that's likely to be most interesting to you.

This platform surfaces personalized content to you from across Office 365. Delve presents you with information based on what you're working on and who you're working with.

Teams is a chat-based workspace that brings together people, conversations and content.

Threaded chats to keep everyone engaged and deeply integrated with other Office 365 applications. Provides a hub for teamwork and gives people all the information and tools they need at their fingertips.

Yammer is a platform for teams to collaborate, share knowledge, and/or engage everyone across the campus.

Post important notifications for the entire campus, or just a select group. Communicate casually with a newly created social group.

Power BI is a suite of business analytics tools that deliver insights throughout your organization.

Connect to hundreds of data sources, simplify data prep, and drive ad hoc analysis. Produce beautiful reports, then publish them for your organization to consume.

Project Online is a flexible online solution for project portfolio management (PPM) and everyday work.

Manage your portfolios, programs and resources for optimal outcomes. Smart online tools help you strategically evaluate and optimize your project portfolio.

Planner is a planning application that lets you easily bring together teams, tasks, documents and conversations for better results.

Create a plan, build a team, assemble and assign tasks, share files and receive progress updates.

Sway is a digital storytelling app designed for creating presentations. Unlike PowerPoint, it is primarily for presenting ideas onscreen rather than to an audience.

Create and share polished, interactive reports, presentations, personal stories and more.

Visio is a diagramming and vector graphics application.

Create simple or complicated diagrams using a wide variety of built-in shapes, objects, and stencils to work with. Useful in creating charts, floorplans, layouts and diagrams.

Forms is a simple, lightweight app designed to help you easily create surveys, quizzes and polls.

Create surveys, quizzes, and polls, and easily see results as they come in. Form data, such as quiz results, can be easily exported to Excel for additional analysis or grading.

Stream is an enterprise video-sharing service.

Upload, view, and share videos securely. Stream makes it easy to comment on videos, tag timecodes and more.
