

Title: Setting up an Android Device on BrockWiFi

Date: August 26th, 2015

Version: 1.0

The following instructions will walk you through setting up your Android Mobile Device to access the BrockWiFi WIFI network

(These instructions will vary slightly as each Android device is different)

Enter your device's Settings menu (usually a wrench)

Select Wireless & Networks -> ensure Wifi is turned ON

Return to Settings menu

Select "Wireless Settings"

Select "BrockWiFi"

EAP method: PEAP

Phase 2 Authentication: MSCHAP v2

Certificate Validation: Disabled or Unspecified

Identity: CAMPUS ID (e.g. ms01ak)

Anonymous Identity: leave blank

Password: same as my.brocku.ca

Click "Connect"

If you need to modify the wireless settings simply press and hold the wireless network and a popup will appear and select modify network
