

## **Inaugural Annual Workshop on Event-Related Potential Techniques.**

Dr. Sid Segalowitz and James Desjardins held the Inaugural Annual Workshop on Event-Related Potential Techniques May 19-23<sup>rd</sup>, 2014. Thirty students and colleagues attended the workshop on ERP methods, with attendees from Brock, Toronto (Ryerson University, York University, Hospital for Sick Children/U of Toronto), Université de Montréal, and Université de Lyons. The five days included a day on introducing Matlab to new users, a review of traditional ERP methods and theory, a hands-on introduction to EEGLAB, a review of new advanced methods focusing on Independent Component Analysis (ICA) and statistical Bootstrapping of ERPs, and a hands-on introduction to ICA. Feedback was very positive and they plan to repeat the workshop annually.
