

Welcomes

Dr. Matthew Brodhead, BCBA-D
Michigan State University

HOW TO USE BEHAVIORAL SYSTEMS ANALYSIS TO CREATE ETHICAL MODELS OF SERVICE DELIVERY

In this workshop, participants will learn how to apply behavioral systems analysis (BSA) to improve employee behavior in service delivery. After a review of BSA, we will survey examples of applications of BSA. Of particular, we will discuss how BSA may be used to reduce risk to ABA clients and providers during the COVID-19 pandemic. Then, participants will practice conducting a BSA and receive expert feedback and support in developing systems that improve employee behavior and ultimately enhance quality of behavioral services. Participants will leave the workshop with a designed intervention they can readily apply in their own organizations, they will also leave with the basic tools to make those interventions better and stronger over time.

Matthew T. Brodhead is an assistant professor at Michigan State University and the Research Director of the Early Learning Institute. His research examines focused social skill interventions for children with autism. He also writes about conceptual issues relating to the ethical and professional behavior of practicing behavior analysts. He is on, or has served on, the editorial boards of multiple behavior-analytic journals, including the Journal of Applied Behavior Analysis, Behavior Analysis in Practice, and The Analysis of Verbal Behavior.

WEBINAR

June 11, 2020
9:00am - 3:00pm

Registration is **FREE** for present and past ADS ABA Practicum Supervisors.

Eligible participants will receive 5 Type 2 CEUs (3 Supervision/2 Ethics)

REGISTRATION CLOSES June 5, 2020
