

& FACULTY OF SOCIAL SCIENCES are proud to offer this full-day workshop
focused on functional analysis:

An Introduction to the Assessment and Treatment of Complex Problem Behaviors

Functional analyses are widely regarded as the gold standard for assessing complex problem behaviors, offering the most accurate method for identifying the underlying functions of behaviors. By precisely determining why a behavior occurs, functional analyses provide critical insights that directly inform the development of effective, individualized treatments. Research consistently shows that function-based treatments are significantly more effective than interventions that do not account for behavioral function. This presentation will provide a comprehensive overview of functional assessment, with a primary focus on functional analyses. We will explore various procedural adaptations of functional analyses that enhance applicability across different settings and populations. Additionally, we will examine the ethical considerations involved in conducting functional analyses, ensuring that assessments are both effective and respectful of individuals' well-being. Finally, we will discuss functional communication training (FCT), one of the most effective interventions derived from functional analysis, which teaches alternative communication methods to reduce problem behaviors.

presented by:

SungWoo Kahng, PhD, BCBA-D, LBA
Rutgers University
New Jersey, USA

April 25, 2025
9:00am - 4:00pm
in-person

[Four Points by Sheraton - Thorold, ON](#)

[REGISTER HERE](#)

[\\$275 \(+fees\) per person](#)

ADS Alumni & ADS 24/25 Practicum
Supervisors - discounted rate
\$250 (+fees) per person

Fee includes parking, materials, light breakfast,
lunch and refreshment breaks and CEUs.
