

## Research @ Brock University

- ◆ Nationally, Brock's Psychology Department is ranked 7th in research productivity and 3rd in research impact! (a recent analysis of 2004 to 2008; see Carleton, Peluso & Asmundson, *CanPsych*, 2010).
- ◆ Faculty are funded by NSERC, SSHRC, CIHR, CFI, OPGRC, etc.
- ◆ Broad range of research from neuroscience to society

## What our students say...

“collaborative research among faculty and students fosters rich learning environment”

“excellent training and mentorship in research and teaching”

## Graduate students join Brock's Centre for Lifespan Development Research!

- ◆ Over 60 multidisciplinary researchers examining development across the lifespan
- ◆ Research labs, observation rooms, testing rooms, lounge space, and student offices
- ◆ National & international colloquia speakers

## What Brock Can Offer You...

- ◆ An intimate and productive environment
- ◆ Faculty who actively publish with students
- ◆ Statistical expertise (e.g., longitudinal data)
- ◆ Excellent research facilities housed in a nationally recognized Lifespan Center
- ◆ Close-knit community of graduate students
- ◆ Opportunity for cross-lab collaborations
- ◆ Faculty who have won graduate student mentorship awards
- ◆ Strong record of students attracting external grants e.g., Vanier (\$150,000 each) and CGS Doctoral Scholarships (\$105,000 each)
- ◆ High success in PhD graduates obtaining academic careers

## Lifespan Development Faculty

- ◆ Andrew Dane: children's aggressive behaviour, peer relationships
- ◆ Angela Evans: deception, moral and social-cognitive development
- ◆ Caitlin Mahy: future-oriented cognition in childhood and aging
- ◆ Cathy Mondloch: face recognition and emotion perception across the lifespan
- ◆ Liz Shulman: adolescent decision-making and risk-taking
- ◆ Sid Segalowitz: brain maturation and the electrophysiology of self-regulation
- ◆ Teena Willoughby: adolescent and emerging adult risk and resilience, mental health
