

Antisemitism

LAW, JUSTICE, AND DECOLONIZATION IN A TIME OF GENOCIDE

As the world watches Israel's devastating war against the Palestinian people, we are seeing a sharp rise in accusations that criticism of Israel is equivalent to antisemitism. We are pleased to welcome this panel of scholars, who are associated with the Jewish Faculty Network, as they consider the weaponization of antisemitism from a variety of angles - at a time when actual antisemitism is surging dangerously and yet going unaddressed.

The JFN is a network of Jewish scholars from universities and colleges across Canada who are committed to addressing all forms of racism and the defence of academic freedom.
