Support Engagement

Student Feedback

- *It was a smooth transition and really taught me that anything is possible when you believe in yourself and when your school also supports and believes in you too!*
- *The main support that helped me was just the information emailed to me through Transfer Connect. There were plenty of documents and events that were aimed directly at me, a transfer student.*
- *I think I was successful because I knew that I had many supports to help me throughout the process.*
