

Acorn Squash

This strong, single-stemmed, bush plant is very productive. Reno acorn squash seeds produce fruit that has golden-yellow flesh that is fine-textured with a sweet nutty flavour. Be sure to plant lots of bee-attracting flowers nearby so every female blossom gets the best potential for setting fruit.

Matures in 70-75 days

Season: Warm season

Exposure: Full sun

Difficulty: Easy, but takes up space

Growing

Direct sow or transplant in late spring once the soil is warm. For transplants, start seeds indoors during the first two weeks of May. Sow seeds 2cm (1") deep. Sow 3 seeds in each spot where you want a plant to grow, and thin to the strongest plant. Space squash 45-60cm (18-24") apart in rows that are 90-120cm (36-48") apart.

Saving

Slice open the fully matured fruit. Remove the pulp and seeds with a spoon and place them in a strainer. Rinse them thoroughly and remove any remaining pulp under running water. Spread the seeds on a tray and allow them to dry completely. Put the seeds into a dated and labeled envelope and return to Brock!
