

## International Centre Abstract

The International Centre is a 46,000 sq. ft. 3 storey building that is located immediately east of 573 Glenridge Avenue and west of Quarryview Residence. The building is clad in brick, architectural stone, glass and metal and forms an important element of the East Campus.

This LEED® Silver certified building was completed in 2010 and is home to Brock International, International Services, IELP / ESL, International Market Development and Classics.

The ground floor consists of 12 seminar rooms, food service space, an International Student's lounge, a general lounge area and public washrooms. The second floor includes offices for Brock International, International Services, International Market Development and IELP / ESL, meeting rooms, a staff lounge and washrooms. The third floor includes offices for Classics, an Archeology Workroom, Cypriot Museum, lounges for faculty, staff and students and washrooms.

Consideration has been given to the design with regard to a Phase II expansion. Thoughtful site planning with the addition of the second phase will result in a design that incorporates a new courtyard and reconfigured parking lot located between the new and existing buildings.

This project is an example of environmentally responsible architecture and has been designed in accordance with the LEED® Canada-NC 1.0 Rating System which recognizes leading edge buildings that incorporate design, construction and operational practices that combine healthy, high-quality and high-performance advantages with reduced environmental impacts. When certified in 2012, this project became Brock University's second LEED® Silver certified project. For more information on LEED visit the Canadian Green Building Council:
