Senate Committees

**Report to the Information Technology & Infrastructure Committee**

**Information Item**

**Topic: Classroom modernization update**

**Date of Meeting: May 21, 2025**

**Rajiv Jhangiani, Vice Provost, Teaching and Learning**

---

## 1. Purpose of the Report

- To provide an update to members of IT&IC concerning planned classroom modernization projects

## 2. Rationale/Background

- Furniture upgrades (new tables and chairs) are being planned for the following classrooms, as they currently either do not meet Ontario Building Code requirements or cannot be used properly as classroom in its current configuration:
    - WH 147
    - WH 8G
    - WH 209
    - ST 108
    - Following the upgrades, all four classrooms will function better from an accessibility perspective without significant loss in capacity. The projects will be completed prior to the start of the Fall 2025 term.
- The Learning Spaces Advisory Group is also designing a brief survey that aims to collect feedback from educators and students about our classrooms and how they might be further improved.
