

# PARENTS

Of 11-18 year olds

## YOU ARE INVITED TO PARTICIPATE....

### *The Study*

- This study examines the development of child and adolescent social-cognitive skills, identity, and well-being.
- We want to learn about what children and teens think about kindness and how being kind helps them to function in school and their daily life.

### *The Details*

- Completed through an interactive, online meeting scheduled at your family's convenience.
- The study involves questionnaires and responding to short stories and videos.
- Compensation is provided.

### *Criteria*

- Children or adolescents between the ages of 11-18.

This study has been reviewed and received ethics clearance through Brock University Office of Research Ethics (REB #22-319).
